

# RIVERINA BUFFALO

Buffalo is quickly becoming a popular alternative to beef. It is lean, high in protein and has minimal fat, making it an extremely healthy choice.

We only source Italian bloodline Riverina buffalo from South Australia, bred for their quality milk and meat.

Due to its popularity, Buffalo is now included in our bespoke butchery program. We buy the whole body so we can supply you with the cuts to the specifications you need.

CODE	PRODUCT
BUDI	Riverina Buffalo Dice
BUFI	Riverina Buffalo Fillet
BUPO	Riverina Buffalo Porterhouse
BUSF	Riverina Buffalo Scotch Fillet

All cuts subject to availability.

## What makes Buffalo meat different?

### Benefits

Buffalo meat is lean, high in protein and iron, making it a healthy choice.

### Cooking

Buffalo needs less time and should be cooked at a lower heat as it does not have all the thick intra-muscular beef fat.

### Taste

A lighter, slightly sweeter and more delicate flavour to beef, making it extremely versatile in many dishes.
