9. Other information on specific ingredients

There are no relevant ingredients present in the fragrance.

10. Reasoned safety evaluation

We only uses ingredients for which a safety clearance procedure is carried out by appropriately qualified people. This procedure takes into account the following:

1. Safety data, including data on close structurally related ingredients generated by RIFM, the suppliers or in open literature in accordance with the principles of the IFRA Code of Practice.
2. A history of safe use of the ingredients, taking into account any reports of adverse effects reported by Dermatologists or other medical professionals.
3. Impurities in the ingredients used, where necessary imposing purity specifications.

Our creative perfumery procedures ensure that the end use and concentration of the fragrance in the product are taken into account when deciding the concentration of the ingredients to be used. This ensures that any restrictions are not exceeded, and that there are appropriate margins of safety for each ingredient with regard to relevant toxicological endpoints.

I confirm that fragrance SAKURA 036 is composed only of ingredients approved by the safety clearance procedure,

20%

Conclusion

The conclusion of the safety evaluation is that this fragrance compound satisfies, according to the current state of knowledge, the safety requirements for the intended application under normal and reasonably foreseeable conditions of use.
