## How to put on Women's Bikini

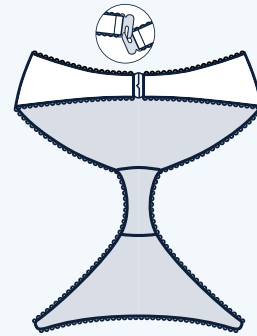

1

Unfold the one-piece UNDERCARE bikini panty. It will look like an hourglass.

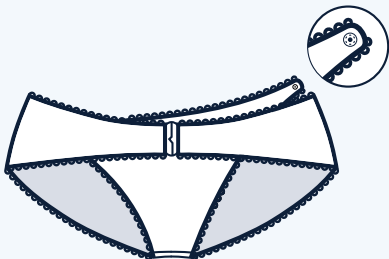

Wrap two ends around the waist – like a belt. Slide snap buckle pieces together. Push the two halves away from you to lock in place and toward you to unfasten.

2

3

Pull front panel (hanging down in back) through legs from back to front. Tuck under belted piece. Snap matching fasteners together.

4

Done! Once on, UNDERCARE functions like traditional underwear. You may pull it up and down in one piece.
