

Bring The Race Track Home

For the drivers that want to feel every single bump on the track. The ones that want every detail fed directly to them like a new born baby. For you, we have our PRO+MOTION Racing Simulator.

This simulator isn't for the feint of heart. This is a real deal beast dialed to be a 1:1 immersive experience.

This simulator moves forward and back, left and right, as well as up and down. It has 6 degrees of motion making it the most complete racing simulator you can have in your home.

Tuned specifically for drivers that are practicing for real life racing or drivers that have an extreme need for speed.

MSRP: \$45,497

INCLUDES TRAINING + INSTALLATION

HOW'S IT PACKAGED?

PRO SIM COACHES 160MM CHASSIS • P1-2 PRO HYDRAULIC STANDARD PEDALS • (3) 43" 4K GAMING MONITORS • SIMUCUBE 2 ULTIMATE • EARTHQUAKE VIBRATION HAPTIC KIT • SPARCO OR OMP RACING SEAT • CUBE CONTROLS GT SPORT WHEEL WITH PADDLE SHIFTERS • STAGE 3 GAMING PC WITH INTEGRATED PC MOUNT • RAZER LEVIATHAN GAMING SPEAKER • TENSION-R SEAT BELT G-FORCE SIMULATOR • DRAGON 6-DOF COMPLETE MOTION UNIT • LOGITECH K400 PLUS KEYBOARD • PROFESSIONAL WIRE TUCK • CORSAIR VIRTUOSO RGB HEADPHONES • WHITE GLOVE DELIVERY AND INSTALL

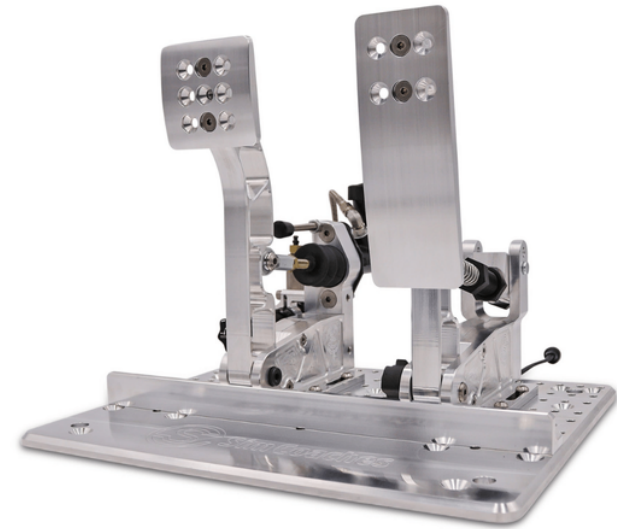

Real Hydraulic Pedals (2 Pedal Set)

INVERTED PEDALS AVAILABLE + CLUTCH UPGRADE AVAILABLE

Our focus is on realism and making product feel like the real thing. After all, if your simulator just feels like a video game, are you really on a simulator?

Designed using real race car parts, these are the pinnacle of sim racing pedals.

With a brake pedal equipped with a 1600PSI pressure sensor, you're sure to be able to match any cars pedal box feel. Includes the clutch pedal.

Direct Drive Wheelbase

The Simucube 2 Ultimate wheelbase is the best of it's class. It offers extreme amounts of detail in your steering wheel giving you ultimate control.

Simucube 2 Ultimate is the highest rated direct drive motor available for sim racers currently. It delivers true 1:1 feedback right to your hands that feels just like your car.

Whether you enjoy GT3 racing, Formula 1, NASCAR, IndyCar, Off-Road Trucks, Buggies, Rally, Drifting or anything I missed, this wheel base can simulate it.

Ultra-Rigid 160MM PRO Chassis

Proper feel on a simulator starts with the chassis. Without a proper chassis setup you'll experience flex.

Our 160MM chassis is incredibly stout and engineered to ensure no flex on the unit. Even with the Hulk sitting in the seat.

43" 4K Gaming Monitors on PRO+ Integrated Chassis Stand

Catch every detail, even those in your peripheral vision with 4K Gaming!! With our triple monitor setup you have gaming screens fully wrapped around your head.

The benefit is being able to see drivers along side you when you're racing hard.

Our PRO+ model uses our free standing monitor stand to ensure they'll be stationary while the unit is moving around. We strap 43" gaming monitors to ensure you have all the detail you'd want.

SimCoaches

6 Degree of Motion Simulator Platform

This motion platform is the most realistic setup available for residential racing simulators. This unit is a full 6DOF motion platform that allows for the corner actuators to lift the unit individually.

This is the only 6DOF motion offering available in the United States for residential use.

PRO+ PRO MOTION SIMULATOR

Tension R Belt Tensioner

How we simulate G-Force without G-Force

It's no secret that simulating g-forces on a simulator isn't easy. To add to the immersion and to add the feeling of g-force we've added the highly sought after Tension R belt tensioner. When you press the brake or accelerate the belt tensioner will pull you into the seat.

This belt tensioner bolts on the bottom of the chassis right behind your seat and will buckle like a regular racing lap belt.

True Racing Steering Wheel

There's no question Cube Controls make very high quality steering wheels. With multiple buttons and encoders on the face of this wheel you can set up every detail like: Pit Speed Limiter, Visor Tear Offs, Headlight Flashing, Brake Bias, Adjust Traction Control and more!

Has paddle shifters allowing drivers to shift without taking their hands off the wheel!

PRO Haptic EARTHQUAKE Vibration

This haptic kit simulates the 4 corners of a car. You can feel every bump on the track along with every curb. These PRO haptic vibration rumblers are part of a custom kit we made here at Sim Coaches.

Paired with 2 (2) channel amps that have the ability to output 300W each, these are sure to create quite a rumble under you.

Weighing 5 pounds each, they're the secret to creating vibration that feels just like the track.

Stage 3 Gaming PC Powered By OriginPC

SIM COACHES LIFETIME WARRANTY INCLUDED ON PC

The computer is the heart of the entire unit. We've teamed up with CORSAIR to bring you incredibly high end PC's that have an outrageous warranty. These are spec'd to our specifications but built in Corsair's factory. These are by far, the best sim racing PC's available on the market. Because they're intentionally built for sim racers.

Current Specs of our Stage 3 Gaming PC's: MSI PRO Z790-A MAX WiFi, Intel i9 CPU, NVidia 4090 GPU, 64GB Corsair Vengeance DDR5 6000 MT/s RAM, iCUE H100i ELITE LCD Display AIO Water Cooler, 6X Corsair LL iCUE RGB Controlled Cooling Fans, Windows 11, Corsair MP600 CORE 1TB Storage *For Operating System, 1TB Samsung OPC Storage *For Other Files, Corsair RM1000X PLUS GOLD Power Supply

Real Racing Seats

Multiple Seat Choices Available

Choosing the correct seat for your simulator is incredibly important. If you cheap out or choose the incorrect seat for your application you will get lower back pain.

That's why we partnered with Sparco and OMP to put only the highest quality seats, with technology meant to keep you comfortable.

These seats are so comfortable, you can sleep in it!

Popular Upgrades

Make your racing simulator unique to your driving. Multiple upgrades are available to match exactly what you like.

Shifter Upgrades:

MME SEQUENTIAL/H-PATTERN (ALL IN ONE) + \$999

If you're looking for a shifter that is a Sequential and an H-pattern in one unit, the MME is a great choice. It has realistic engagement and gives confidence you're in gear. At the price, it's best in its class as other shifters around this price are only one or the other. 7 Speed + Reverse Lockout along with Sequential Up and Down.

SIMWORX SUPERCAR SEQUENTIAL SHIFTER + \$1,297

This sequential shifter is the best sequential only on the market. Although it's pricey, it's a 1:1 model of the sequential shifters in Australia's V8 Supercar Series.

SimWorx is a company based out of Australia that focuses on making realistic products found on real race cars. The engagement into gear is unlike any other sequential on the market. This is a top choice for drivers that race sequential only because it feels just like a real sequential gearbox.

Popular Upgrades

Make your racing simulator unique to your driving. Multiple upgrades are available to match exactly what you like.

Shifter Upgrades:

BDH SEQUENTIAL/H-PATTERN (ALL IN ONE) + \$1,437

BDH creates one of the best feeling all in one shifters on the market. Based out of United Kingdom, this small team builds only one product. Their all in one bazooka shifter. This is V2 of their product design that includes both shifting styles, H-Pattern and Sequential. Very good, highly rated shifter.

Handbrake Upgrade:

SIM COACHES P1 PRO HYDRAULIC HANDBRAKE + \$750 MSRP **\$675 When Purchased On Turn Key**

Looking to do a bit of drifting or rally racing? If so, a handbrake is a MUST. Sim Coaches P1 Pro Handbrake is the top of the line handbrake on the market. Covered by our Lifetime Warranty this handbrake will be the last you purchase. Being hydraulic, there isn't another handbrake on the market that touches how this one feels. This is the only true hydraulic handbrake offered on the market.

(15% discount when purchased on a turn key build)

Popular Upgrades

Make your racing simulator unique to your driving. Multiple upgrades are available to match exactly what you like.

Steering Wheel Upgrades:

GSI HYPER P1 FORMULA WHEEL + \$2,160

This is easily the most high end formula wheel on the market. With 12 RGB backlit buttons, 5 RGB backlit encoders, 72 mappable inputs, an LCD screen and 20 LEDs for shifting + ABS, it's hard to beat it. This wheel is meant for the drivers looking for the ultimate formula experience.

We fully calibrate this wheel to ensure proper usage.

GSI FORMULA PRO ELITE + \$1,597

The GSI Formula Pro Elite is a toned down version of their Hyper P1. This wheel is 300mm in diameter making it a competitive size for GT/Formular car racing. Includes 12 RGB backlit buttons, 2 funky switches, 5 encoders and 2 thumb rotaries. This is a great wheel at a great price.

GSI X-29 GT/Formular WHEEL + \$867

This is GSI's entry level wheel. But don't let that scare you, this is a very powerful wheel. It's equipped with 10 RGB backlit buttons, 2 seven way funky switches and 3 encoders. This wheel does not include any LED's or an LCD screen. Perfect for drivers that don't need a display.

Popular Upgrades

Make your racing simulator unique to your driving. Multiple upgrades are available to match exactly what you like.

Steering Wheel Upgrades:

GSI GT32MAX GT RACING WHEEL + \$1,789

This round wheel is the only full round wheel in the GSI lineup. With 8 RGB buttons, 5 encoders, 3 seven way funky switches, an LCD screen and LEDs, this wheel is stacked.

This wheel requires Simucube 2 PRO or above to properly operate because of how much weight it has behind it. Will fit Pro turn key simulators and above.

VPG V-RSPG PRO + \$2,794

The VPG V-RSPG PRO is one of the highest end wheels on the market. Modeled after the COSWORTH Race Car Wheel, this carbon fiber option is top of the line. With 10 RGB backlit buttons, 4 encoders, 4 thumb rotaries and 2 funky switches, this is a top choice for GT Car Racers.

VPG V-PGT Porsche Replica Wheel + \$2,596

The VPG V-PGT Porsche Replica Wheel is one of the best replicas you'll find on the market. With it's light weight feel, you're sure to feel every bit of information from your wheel. Center emblem can be changed to the Porsche Emblem to completely replicate Porsche.

FLIGHT SIMULATION UPGRADES

Make your racing simulator unique to your driving. Multiple upgrades are available to match exactly what you like.

FLIGHT SIM OPTIONS:

FIGHTER PILOT SIMULATION ADD-ON + \$5,820

This is a complete add on kit for fighter pilot simulation. You'll have a throttle quadrant, rudder pedals, and the fighter joystick. We also add a 4th monitor to the top to give you more field of view when flying. Fly through the skies and dog fight with your friends or other pilots online. This kit stays on your simulator making it a 2-in-1. Compatible with helicopter add-on. [*4th monitor not pictured.](#)

HELICOPTER CONTROL PILOT SIMULATION ADD-ON + \$5,135

Are you looking to fly through the skies like a helicopter pilot? This upgrade is for you. Comes with the rotor control, rudder pedals and center mounted joystick to control the helicopter. We add a 4th monitor on the top to give you more field of view while you're flying. [*4th monitor not pictured.](#)

[SAVE MONEY WHEN YOU COMBINE THIS ADD ON WITH FIGHTER PILOT ADD ON. \(-\\$1,100\)](#)
