

TROUBLESHOOTING GUIDE TO ROCKER NOISE

If your GCI Rocker has started to make noise, try one of these three methods and you'll be back to rocking in peace and quiet in no time!

FOR CLICKING SOUNDS

METHOD 1

Tighten these bolts.

FOR SQUEAKING SOUNDS

METHOD 2

Using silicone lubricant spray, spray a small amount on both sides of the frame, where the frame meets the lower foot.

METHOD 3

Using silicone lubricant spray, spray around the top of the shock.

TIP: You can typically find silicone lubricant spray at hardware or home improvement stores.
