

Installation Instruction

Step 1

Have the pump plug through the PVC pipe on the big reservoir, and pull out from the notch at the bottom.

Step 2

Cover the black plastic cap on the PVC pipe.

Step 3

Attach the pump to the braided hose that comes with the fountains, and fastened tight.

Carolina Outdoor Fountain

Step 4

Fill reservoir with clean water and ensure pump is fully submerged. Plug in the pump.

Step 5

For little adjustment, twist the water controller on the pump to an ideal water flow.

Step 5

Check the water effect. Use the black plastic shim to adjust the level of water, able to insert it on the bottom of the fountain or between different parts of the products .

As the pump is water cooled, allowing it to run dry may result in the pump burning out, invalidating the warranty.

DO NOT allow the pump to run dry!
