HOW TO LOVE WINTER- OUR ANNUAL WINTER BOOTS GUIDE

 EDITORIAL TEAM * NOVEMBER 29, 2023

Winter can be a bit of a grind, but take the cold out of the equation and winter might just become your new favourite season. Start with your feet. A proper, quality pair of winter boots is a worthwhile investment. Keeping your feet warm is crucial to keeping your entire body warm, and preventing frostbite. When the temps drop to **-40 Celsius**, frostbite only takes 10 minutes to kick in.

Keep that summer pedicure dream alive, and instead invest in a pair of boots your feet will love. We bring you our favourite finds this season.

WINTER BOOTS MAKE WINTER FOR WINTER FUN

Cougar Knows Canadian Winters

We love this modern look from a Canadian outfit **Cougar Boots**. The **Verona Nylon and Leather Wedge Waterproof Boot with PrimaLoft® (\$250)** is a fashion-forward look that adds a few inches. The dramatic height keeps your feet stylish and safe from ice and slush, up to a very brisk **-24°C**. Anti-slip Thermoplastic rubber outsole gives you traction against slips and spills and a polar fleece lining feels like a hug to your heels. Available in Black, and Loden- an army-style green that adds some interest.

Cougar's Verona Boots will take your look to new heights
