2. Rotate the crown to turn the hands in a clockwise motion until you reach the correct time
3. Push the crown back into the first position.

CARE AND HANDLING OF WATCHES LEATHER STRAP

A brand new leather strap may feel a little stiff. Leather straps require a short break-in period of one to two weeks of consistent wear to soften.

Avoid wearing the watch in humid conditions or getting the strap wet (in a bathroom, in the pool, in the ocean etc.) as leather is prone to breaking down when sufficiently wet.

WATER RESISTANCE

The Watch is rated for 3 ATM / 5ATM / 10ATM water resistance. This means the watch is splash and rain resistant but not suitable for submersion, bathing, or any other water-related activity. Please bear in mind that regardless of water resistance, the watch should never be worn in hot tubs, showers, saunas, or steam rooms
