

AIR-CORE™ ADJUSTABLE PILLOW

- Adjustable support for more restful sleep
- Soft fiber shell with one built-in inflatable neck roll
- Customize level of support by adding or removing air
- Shaped center gently cradles the head while sleeping on the back

Available From:

ENHANCED SLEEP

Whether you prefer gentle or very firm neck support while you sleep, the Air-Core™ Adjustable Pillow can easily accommodate your support preference. This pillow is commonly used to help treat a variety of conditions affecting the neck and shoulders. This pillow is designed with the same features of our popular Tri-Core® Cervical Support Pillow with the addition of an inflatable neck roll for convenient adjustability.

PROPER SUPPORT

An inflatable neck roll is built into one of the cervical lobes for customized support. The pillow's shaped center gently cradles the head for better sleep when lying on the back. When sleeping on your side, the raised side panels will help keep the head level for proper alignment of the spine.

If you are new to sleeping on a cervical pillow, the Air-Core may help reduce the time it takes for your body to adjust to its new sleeping posture. Carefully follow the instructions included in the package for a step-by-step explanation on how to adjust to sleeping on your new pillow.

ADJUSTABLE SUPPORT
