Available From:

SUPPORTIVE & COMFORTABLE

The CerviLoft™ pillow features a removable neck roll that assists in restoring the natural curve of the neck to help alleviate headaches and neck pain. Customize your pillow by removing or adding as much fiber as you desire. The cooling gel memory foam layer keeps you cool and comfortable while sleeping. This pillow is ideal for back sleepers looking for extra neck support.

The pillow is customizable; it will arrive overstuffed so you can simply unzip the cover to remove as much fiber as you would like. The soft, clean, virgin cluster fiber increases the life of the pillow because the little fiber balls rearrange themselves inside the pillow when “fluffed”, preventing lumping and increasing the resiliency of the pillow. Cluster fiber is soft, does not clump or bunch, is hypoallergenic, and machine washable for added convenience and easy care. Simply remove or add stuffing throughout the life of your pillow to suit your size, shape, or sleep position. This puts you in control - soft or firm, the choice is yours.

Constructed from precision cut, high quality foam, the removable neck roll provides firm support for the cervical spine. This roll is used to help restore the natural curve of the neck to help alleviate headaches and neck pain. It may take some time to adjust to this cervical pillow and immediate overuse may increase neck pain. Those who slowly ease their way into orthopedic correction, by alternating between this pillow and their current pillow, achieve the best results.

Stay cool and comfortable while sleeping by laying on the side featuring a layer of cooling gel memory foam. Memory foam will gently cradle and conform to the shape of the head and neck and reduce pressure to help relieve pain and soreness for a restful, restorative night's sleep.

SPECIFICATIONS

Product Selection: CerviLoft™
Adjustable Cervical Comfort Pillow
FIB-256 Creamy White

Product Weight: 3.264 lbs

Dimensions: Pillow: 24" x 16" |
