

CORE® CPAP PILLOW SIDE SLEEPING PILLOW

- Provides increased compliance and comfort for CPAP users
- Unique shape accommodates CPAP masks, hoses, and headgear
- Fitted pillowcase included
- Helps prevent mask leaks and pressure point soreness
- Accommodates both left and right side sleeping

The Mini can be placed on top of a regular pillow if additional elevation is needed. It also is a great travel option for patients accustomed to sleeping on a Standard Core CPAP Pillow.

Available From:

CPAP COMPLIANCE

The Core® CPAP Pillow was designed by CPAP users, for CPAP users. This unique and patented pillow has a quilted side panel which creates a distinct edge that will not collapse, allowing the mask to comfortably hang over the side of the pillow. This prevents the mask from being forced into the side of the face causing leakage or pressure point soreness that occurs with a traditional pillow. The Core CPAP Pillow is available in Standard (4" Loft) or Mini size.

ACCOMMODATING DESIGN

The Core CPAP Pillow's design makes it durable enough to support the head and neck without losing its edge, yet soft enough to sleep on all night. The pillow is comfortable for both side and stomach sleepers. In addition to CPAP users, patients required to sleep on their side for other reasons such as oral or dental appliances, fibromyalgia and chronic pain sufferers or pregnancy can benefit from the Core CPAP Pillow and its unique shape.
