- Flexible stays help increase stability and support
- Opening behind knee helps increase comfort
- Heat therapy, support, and compression to help reduce pain
- Helps relieve aches, pains, strains, sprains, and weakened knees
- Bilateral design fits right or left knee

Available From:

FUNCTIONAL & COMFORTABLE

The Swede-O® Thermal Vent® Open Knee Wrap Stabilizer provides comfortable support, gentle compression, and heat therapy to help relieve knee pain and promote healing. The flexible internal stays provide medial and lateral knee support for increased stability.

The wrap around design is easy and less painful to apply and adjust compared to pull-on style knee supports. The front opening reduces pressure across the patella which helps prevent aggravation to tenderness or bruising. Popliteal cut out helps increase comfort and reduces material bunching during knee flexion.

The adjustable closures provide a customized fit and allow for variations due to swelling. The material is soft and comfortable against the skin; bilateral design fits right or left knee.

THERMAL TECHNOLOGY

Engineered with MVT²: MicroVentilated Thermal Technology™
Thermal Vent Supports are a valuable aid to help rehabilitate injured tissue. These products provide warmth and heat therapy to help increase pliability and elasticity of muscles and tendons, making them more responsive to therapy and exercise.

SPECIFICATIONS

Product Selection: Swede-O® Thermal Vent® Open Knee Wrap Stabilizer
BRE-6453, Gray

Product Weight: .45 lbs

Dimensions:
Small: 10" x 16"
Medium: 10" x 16.5"
