PILOT PA200A23 2 Place MiniCom

The Pilot PA200 MiniCom breaks new ground in size, ease of operation and price in 2 place voice activated portable intercoms.

All you have to do to use your Pilot PA 200 MiniCom is place a 9 volt battery in the battery compartment, plug in your headsets and turn the volume control to on. The squelch knob is used to compensate for background noise levels and should be set so that the intercom's voice activation turns on the intercom audio when you speak at a normal voice level.

To use with a hand held radio, the plug on the PA 200 MiniCom should be plugged into a compatible radio. The press-to-talk switch supplied should be plugged into the PTT socket on the front of the PA200 MiniCom.

Your PA200A23 should have come with the following components:

PA200 MiniCom with plug suitable for Icom A5 or A23
Press-to-talk switch and cable
