## *PILOT PA200T 2 Place MiniCom*

The Pilot PA200T MiniCom breaks new ground in size, ease of operation and price in 2 place voice activated portable intercoms.

All you have to do to use your Pilot PA200T MiniCom is place a 9 volt battery in the battery compartment, plug in your headsets and turn the volume control to on. The squelch knob is used to compensate for background noise levels and should be set so that the intercom's voice activation turns on the intercom audio when you speak at a normal voice level.

The microphone jack on the intercom lead incorporates a Y-block with provision for two press-to-talk switches, one for the pilot and one for the co-pilot. Bear in mind that most press-to-talk switch leads have a male microphone jack as well as a female microphone socket. When using a press-to-talk switch with the PA200T MiniCom, the male microphone jack is plugged into the back of the Y-block. The female microphone socket is not used (the microphone jack from your headsets being plugged directly into the intercom). Please note, that both pilot and co-pilot mics are "live" at all times meaning that when either press-to-talk switch is pressed voice from both pilot and co-pilot will be transmitted.

The PA200T MiniCom may also be connected to your cell phone or a music source such as an MP3 player, walkman or similar using the 3.5mm adapter provided.

To use your iPhone, plug the 3.5mm 3 pole plug on the cable provided into the socket on the end of the short lead and plug the 3.5mm 4 pole plug into the socket on your iPhone. Will also work with other "smart" phones such as Samsung, HTC and Blackberry that use a 3.5mm/4pole headset (hands free) plug.

To use a music device with your PA200T, plug the 3.5mm 3 pole plug on the cable provided into the socket on the end of the short lead, insert the 3.5mm 3 pole plug into your music device.

There is a 3.5mm expansion socket on the face of the MiniCom which can be used with a PA200EX expansion module to create a 4 place intercom

### **Your PA200T should have come with the following components:**

PA200T MiniCom  
iPhone adapter cable  
Music adapter cable

### **Specifications and Features**

On/Off volume control  
Adjustable squelch circuitry  
Fail safe capability  
Powered by 9v battery  
Up to 24 hours use on one battery  
Measures 5.7cm x 3.5cm x 7cm  
Weighs only 8oz (227gms)  
3 year warranty
