

Care & Feeding of “THE BEAST” From LIGHTNING LAP

Warning: You are about to release “The BEAST” of beauty in diamond polishing, especially formulated for the LL and used with hard stones like Corundum and CZ.

Place about 6-10 "**tiny**" dots of The Beast on the LL surface. Distribute under power using a boron stick or suitable smooth, clean, broad surfaced synthetic or similar gem rough.
NOTE: Resist the temptation to add more polish! More is NOT better! Keep spreading by reversing direction until the whole lap is shiny.

In use, run a slow drip of water, (about 1 drop/3sec.), more if the lap is running at faster speeds.

The combination of The LL, The Beast, water drip and speed will provide a fantastically quick and scratch-free facet for harder stones.

Cleaning The Beast from the LL:

- 1) Apply alcohol and clean, paper towel or shop cloth.
- 2) Scrub with water, Lava soap, or cleanser and brass brush or 3M Scrunge pad.
- 3) Rinse thoroughly
- 4) Apply WD40
- 5) Wipe Dry

You are now ready to use another polish.

Enjoy!
