SIZE GUIDE

BRACELETS

NANIS bracelets can be worn in different ways depending on the model and on your way to wear them. You can choose whether to wear them softly, leaving them moving or closer to the wrist.

BRACELETS WITH CLOSURE

NANIS bracelets with box clasp or snap-hook closure have a unique size which is different for each model and it is indicated in the jewel description. For special measures send us a request.

BANGLES

NANIS bangles are rigid and open bracelets, easily wearable thanks to their elasticity. To choose your size, measure the circumference of your wrist using a tape measure (or a paper strip and check the size on a ruler). Check the measurement with the table below. For an optimal comfort, we recommend you to add a centimeter to the length you obtain.

SIZE	S	M	L
WRIST CIRCUMFERENCE IN CM	13,5 - 15,5	15,5 - 17,5	17,5 - 19

SIZE GUIDE

RINGS

Each NANIS ring is normally available in three standard sizes 13/14/15.

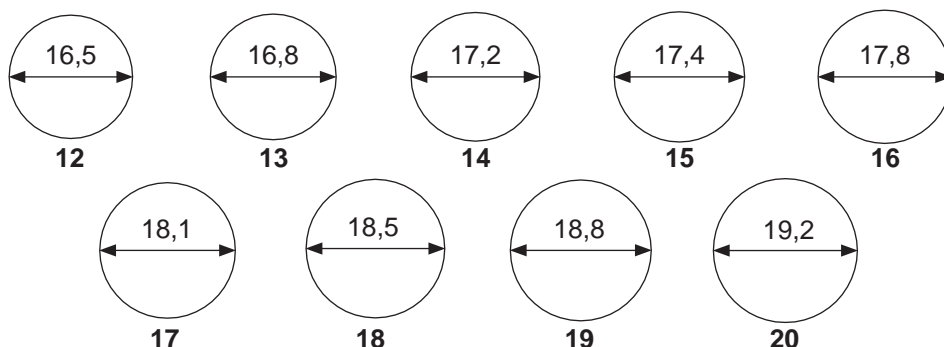

The most requested size is the 14, which we consider standard.

To discover your size take a ring that suits you and measure its diameter by drawing the inner circumference in a sheet. Alternatively, use the table below, being careful to print it correctly.

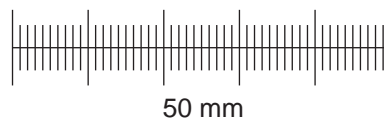

Make sure the printer has the zoom set at 100% and that the table doesn't adapt to the page, so that the printed table is faithful to the one on the screen.

Place the ring on the sheet and move it along the circles until you find the one that perfectly matches the size, then read the corresponding measure.

SIZE RING	12	13	14	15	16	17	18	19	20
Diameter in mm	16,5	16,8	17,2	17,4	17,8	18,1	18,5	18,8	19,2
Circumference in mm	51,8	52,8	54	54,6	55,9	56,8	58,1	59	60,3

Check that your print document matches exactly

SIZE GUIDE

NECKLACES

Each model of NANIS necklace is conceived to be worn in different ways. For each model there are often different length versions so to meet different needs and tastes. Most necklaces have a length between 42 and 60 cm.

A necklace with a length of 42 cm will place its central element approximately on the collarbones line.

A necklace with a length of 60 cm will rest in the center of the décolleté.

Necklaces up to 80 or 90 cm long will arrive just above the navel.

Some “long” NANIS necklaces sometimes suggest different ways of being worn.

With simple gestures they can turn into another jewel.

The diagram below gives a rough idea of the lengths that will also depend on the height and build of the wearer.
