

PRODUCT BRIEFING

OystaZIN[®]

OYSTER EXTRACT POWDER

OystaZIN[®] is a premium grade, 100% natural freeze-dried Oyster extract - derived from the Pacific oyster species (*Crassostrea gigas*). Oyster Powder is rich in Glycogen, Zinc, and Taurine. These supplements can be beneficial for improving energy levels, cardiovascular health, blood pressure, arthritis, and rheumatism.

The marine farms in which *Crassostrea gigas* oysters are cultivated are unpolluted and continually monitored. Aroma's oyster extract powder flesh is collected at times of the year when in its most concentrated form. This ensures 100% purity and quality of OystaZIN[®].

Oyster Powder is rich in EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid). These fatty-acids can have various health benefits, including the support of healthy cholesterol levels and reducing the risk of chronic diseases.

Being rich Vitamin C (and many other Vitamins), Oyster Powder can also help to improve immunity and slow down age-related macular degeneration.

GLYCOGEN

Glycogen is the main sugar source in Oyster Powder. It is quick to absorb, making it great for patients who have indigestive issues.

ZINC

Oyster Powder is also rich in Zinc, which can activate the sexual hormone and in turn, can support male vitality, vigour and stamina.

TAURINE

Taurine can be effective for improving energy levels, reducing cholesterol levels and possible prevention of anaemia.

PHYSICAL ASPECT: OystaZIN[®] is a free flowing beige powder with high bulk density - ideal for capsules and tablets.

PACKAGING: Available in 25kg cartons.

STORAGE: Keep this product in a cool dark room, out of direct sunlight.

GMO: This product is GMO-free, does not undergo any radiation treatment or contain any ingredient treated by radiation.
