

For all your garden luxuries...

---

## **Instructions for assembling Layzee Living wooden Pergola.**

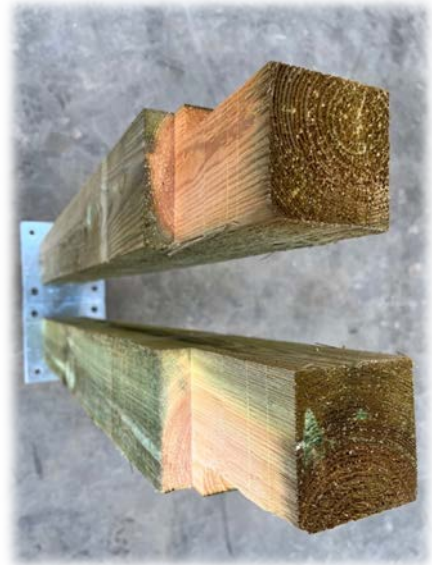

- Fix metal base plates to bottom of posts with 4no 3" screws (actual type of plates may vary depending on current version)

For all your garden luxuries...

- Posts are handed so they are notched at two different levels.

- The side rail with multiple notches joins onto the side of the post with the deepest notch. Lay posts approx. 3m apart and fix a side rail onto the deepest notch with the end groove of the rail in line with the higher groove. This is so when you start inserting the runners the end ones sit tight against the post. Once positioned use the small 6mm drill to pilot hole the rail and use 2no 3" screws to fix in place
- Repeat the process with the other side.

For all your garden luxuries...

- Stand two posts up (side rail to the outside) and fix in place using either the wood bit or concrete bit to drill into your deck or concrete pad, (if you are fixing longer posts into concrete then ignore this step and insert posts into concrete hole, ensure you build the complete pergola and screw together before concreting to ensure it all fits). Fix 1 bolt and a washer in each base plate. This is a two-man job or better with 3.
- **DO NOT BOLT DOWN OR CONCRETE THE TWO POSTS FULLY YET!**

For all your garden luxuries...

- Now place the two “goal post” structures you have built opposite each other and start inserting the runners, fix in place by drilling a pilot hole then use the 4" screws to hold in place.

For all your garden luxuries...

- There are two wood diagonals to go at each corner. Predrill approx. 1” from each end and fix in place using 1no screw. They also help square up the posts and keep the pergola/lean to more stable.
- At this point measure corner to corner to get structure squared up. Using a spirit level straighten the posts.

- If you are happy that all is lined up to your satisfaction you can now fit and tighten all bolts and washers
- Enjoy your new pergola!
