Features

Granite stone is widely used for kitchen countertops, table tops, work tops, bathroom counters, wall cladding, roofing, flooring, and a variety of other interior & exterior applications.

- **Appearance:** Consistency in color and texture and the hardness with excellent wear protection
- **Anti Scale Properties and Heat Resistance:** High density, strength and dimensional stability
- **Scratch Resistant:** Surface hardness higher than normal Iron
- **Stain Resistant:** Water absorption rate < **0.03%**, Nearly non porous structure
- **Chemical Resistance:** Acid and Alkali resistance, hence best suited for kitchen tops
- **Antibacterial:** The surface is inhospitable for bacteria and moulds hence destroys
- **Easy Maintenance:** Single stroke cleaning with just soap and water to get that brand new shine
- **Thickness:** 12, 20 and 30 mm in standard slabs; 40mm and 50mm on demand
- **Size:**
 - 65 cm to 90 cm x 180 cm to 330 cm
 - 120 cm to 125 cm x 220 cm to 330 cm
 - 160 cm to 210 cm x 280 cm to 340 cm
- **100% Customization Support basis customer's demand**

Quality: Our first priority

- We give **top quality at guaranteed best price**. Largest network of trusted sellers
- Highly **qualified sourcing partner** with 50+ yrs experience as manufacturers in stone industry
- **Supplier qualification report (SQR)** shared with buyer to maintain a **transparent relationship**.

The score is based on -

- Quality of material used (Sqrt (n+1) sampling done by industry experts)
- The production capacity (We only deal with suppliers having annual turnover > **\$2 Million**)
- The credit worthiness of supplier (The credit rating of the supplier)
- Compliance to legal standards (100% FDA and ICMR approved medicines)
- Performance on his last 3 transactions (We take the ratings on product quality, performance and timely delivery)

Technology we bring in

- We give **real-time QC updates** during production and **coordinate updates** during product transportation thus ensuring buyer has complete control over quality and delivery of product
- **AI and big data are the core of our company.** Our algorithms continuously analyse the commodity level industry trends to predict emerging markets in import and export. These **import-export reports are shared free of cost** with our buyer network, thus helping them increase their business by more than 20%
- **Legal documentation assistance** right from supplier qualifications to custom clearance of finished goods. Buyers are given streamlined access to the data of SMEs in a trusted manner

We specialize in building long term relationships. Try us out once and you will stick to us forever!
