We hope you will enjoy browsing through our latest catalogue and come to discover the delights of planting and tasting fresh healthy fruit from your own garden. The mystery of purchasing shop bought fruit will disappear as you will now know what sprays, chemicals and fertilisers have been applied to the food you eat.

To ensure a wide selection of trees, we order from a number of different suppliers. Therefore, the availability of stock listed in this catalogue is subject to delivery from our suppliers.

We will notify customers as their orders are filled and unless prior arrangements are made, we require all orders to be collected by the end of July. This will ensure that customers receive their trees in prime condition.

Whilst Chandlers Nursery will take every possible precaution to ensure that the trees we sell are true to name and label, we cannot be held responsible for errors outside our control. We will replace wrongly labelled trees where possible or substitute where necessary, providing proof of purchase is presented. We advise you to pre-order to ensure your selection is available. Please do not hesitate to contact us if you have any queries.

### PLANTING AND CARE

The site of planting should be well prepared prior to planting. Dig a hole roughly double the size of the root ball and mix compost or manure with the existing soil. We recommend Chandlers Organic Compost for planting. Water in well with Seasol and firm the soil gently. Seasol stimulates root growth and minimises transplant shock. This is especially important as a lot of our fruit trees are ground grown and are dug up when dormant. Continue Seasol fortnightly until the beginning of spring. This will improve drought hardiness of your tree. For people in drier areas, it would be advisable to plant fruit trees with water storage crystals or Seasol Planting Gel.

Spring is the time to mulch around your fruit trees, ensuring to leave a gap around the trunk. This helps retain moisture in the soil and prevents competitive weeds from sprouting. Our dry summers can make it hard for fruit trees to establish and we suggest several deep soakings a week either using an automatic system, or by hand. Increase this to 3-4 times a week in very hot weather.

Pests and diseases can also hinder the establishment of your new fruit trees. We offer spray programs for the most common pests and diseases which are available in store or on our website.

## **APPLES**

### **COX'S ORANGE PIPPIN** \$44.95

Excellent dessert apple. Well flavoured, crisp and juicy. Mid season maturity.

### **GALA** \$49.95

Orange-red skin with crispy, white flesh. Early to mid season maturity.

20th Century / Williams

## **CITRUS TREES**

The following varieties are available in 250mm pots unless specified.

**\$64.95** unless priced

### **CUMQUAT**

#### **GREEN CUMQUAT**

Evergreen, medium shrub producing small round fruit that can be used for marmalade or liqueurs.

### **LEMONS**

#### **EUREKA**

Grows to 3 metres, producing good crops of large lemons. Mostly thornless.

#### **MEYER**

The most popular home garden variety. Smaller fruit with a pale orange tinge. Prolific bearing tree to 2.5 metres.

#### **YUZU**

Japanese lemon with tart, yellow fruit. Used for adding flavour to sauces, preserves and cooking. Very cold hardy. 20cm Pot \$59.95.

## **LIMES**

### **TAHITIAN**

Medium sized fruit with a thin rind. Green to pale yellow at maturity. Grows approximately 2 metres tall.

### **KAFFIR**

Aromatic, citrus flavoured leaves that are used in Asian cooking.

## **NATIVE LIMES \$79.95**

Available in 20cm pots only.

### **FINGER**

Also known as "Lime Caviar". Effervescent, tangy flavour. Recently popularised as a gourmet garnish.

### **BLOOD RED CENTRE**

A cross between a finger lime and an acid mandarin. Blood-red rind, flesh and juice. A variety developed by the CSIRO.

### **RAINFOREST PEARL**

Green fruit, tinged with crimson, with pink flesh.

## **MANDARINS**

### **EMPEROR**

Requires a warm, sheltered position for best results. Good flavoured fruit produced from May to July.

### **IMPERIAL**

A tried and true variety with good flavoured fruit with thin skin, making it easy to peel.

### **JAPANESE SEEDLESS**

A delicious seedless variety that has loose skin and is easy to peel. The most cold hardy of all citrus. Perfect for cold climates as it has a low heat requirement for ripening of fruit.

## **ORANGES**

### **WASHINGTON NAVEL**

An excellent, seedless eating orange.

### **BLOOD**

Sweet, juicy orange with red flesh. Needs a warm, protected position.

### **SEVILLE**

Also known as the sour orange. Excellent for cooking and marmalade. With its larger, deep green, glossy leaves, this orange makes a great ornamental tree. Blooms are very fragrant.

### VALENCIA

Sweet fruit, that is very good for eating and juicing.

### **DOUBLE GRAFTED** \$99.00

LIME/LIME Tahitian / Kaffir

### **DWARF CITRUS** \$79.95

All of these citrus are grown on dwarf rootstock. In the Tasmanian climate they will only grow to approximately 2.5m.

### LEMON

Eureka

Meyer

### LIME

Tahitian

## **OTHER EDIBLES**

### AVOCADO \$99.00

Hass and Bacon varieties. Both are well suited to our climate. 250mm pot.

### BLACKBERRY \$17.95

Thornless, non-invasive variety.

### BOYSENBERRY \$17.95

Cross between a raspberry and blackberry.

### CURRANTS \$17.95

Black, red and white varieties.

### FIGS - \$79.95

### BLACK GENOA

Large fruit with greenish-purple skin and sweet, light-red flesh. 250mm pot.

### BROWN TURKEY

Large, brown-skinned fruit with sweet, pink flesh. 250mm pot.

### GOOSEBERRY \$17.95

Captivator, a thornless variety.
