

Winter Spray for Fruit Trees

Trees: Apple, pear, peaches, nectarines & apricots

Pest & diseases: Leaf curl, shothole, gummosis, rust, freckle, apple & pear scab, mites & scale .

After winter pruning apply Lime Sulphur. One week later apply Pest Oil. At the first sign of bud swell spray with Liquid Copper and apply again one week later.

Timing of this spray is very important.

Apply again after harvest for apricots.

For leaf curl, spray again with liquid copper at leaf drop in autumn.
