FURTHER STEPS

The following steps should be considered in order to maintain effective use of your Espressotoria® Capsule Machine.

Daily rinsing

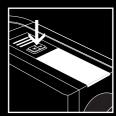

1. Make sure there is no capsule in the brewing chamber

2.) Place a cup under the dispenser

3. Press one of the lighted dispensing buttons (the machine will dispense water)

Refilling the water tank

(1.) Turn off machine

(2.) Fill tank to the 'max' line

NOTE

- Only use cold water
- Never use distilled water

3 Press one of the dispensing buttons until a regular flow of water is obtained

Ejecting the capsule

1. Eject the capsule after each coffee has been extracted completely

NOTE

- Ejecting the capsule too quickly after use will cause excess dripping internally
- Leaving the capsule inside the brewing chamber may result in dripping from the dispensing head

MAINTENANCE CHECKLIST

For optimal usage of your Espressotoria® Capsule Machine please make sure you are cleaning your machine once a week.

3-minute cleaning mode

Press both dispensing buttons for 6 seconds, until the left button glows blue, then release them.

NOTE

- No capsule in brewing chamber
- Fill tank with water prior to cleaning
- Place waste vessel under dispenser. Must be large enough to hold full tank of water
 - Cleaning mode can not be performed in standby mode

CAUTION HOT

See further steps on back cover.
