SUSTAINABLE PACKAGING

As an industry pioneer in sustainable packaging, Progress Luv2Pak is committed to the care of our planet and considers ecological impact in every decision we make.

Our sustainability icons allow you to quickly identify our environmentally friendly packaging solutions to help you meet your goals.

RECYCLED MATERIALS:

Defining the percentage of recycled content, whether it is post-consumer (PCR) or post-industrial (PIR).

RENEWABLE MATERIALS:

Materials derived from rapidly regenerating materials such as bamboo, grass pulp, sugarcane and more.

THIRD PARTY CERTIFIED MATERIALS:

Progress Luv2Pak is proud to be accredited to offer a triad of the world's best chain of custody certifications for our paper products. We offer materials certified from managed systems, with options for 100% virgin fibre coming from managed forests, recycled content coming from managed recycling streams, or a mix of both.

REUSABILITY:

Packaging designed with enhanced durability and/or functionality in mind for maximum, meaningful reuse, whether it be a shopping bag engineered to exceed all legislated standards for reusability or a premium gift box that offers secondary use as a keepsake vessel.

CURBSIDE RECYCLABILITY:

For packaging to be truly recyclable, it must be accepted in the municipal recycling programs where your products are sold and should have clear instructions on any disassembly required for responsible recycling.
