

# Albright's

All Natural Raw Pet Food

**Our Mission: To increase collective dog longevity by 100,000 years through biologically appropriate nutrition.**

## **When Your Food Arrives**

Albright's may arrive frozen or partially thawed. As long as the packaging is cold to the touch, the food is suitable for feeding. Wipe off and feed right away or freeze for later.

## **After the Thaw**

Once fully thawed, the food must be fed within 72 hours or refrozen. If refreezing is desired, portion or repackage and return to the freezer in a timely manner.

## **Thawing Best Practices**

It is best to thaw our products in the refrigerator in a bowl or dish. If dividing into smaller portions, chubs cut much easier (without the mess!) after a 12 to 14-hour thaw. The product is fully thawed in 2-3 days.

## **Miscellaneous**

Food is made in small batches and may slightly vary in color and consistency from batch to batch.

**Thank you for joining our movement!**

# Feeding Guidelines

## Step 1: Determine Dog's Activity Level

Low Activity	Less than 1 hour
Moderate Activity	1-3 hours of low impact activity
	1-3 hours of high impact activity
High Activity	3-6 hours (i.e. working dogs)
	High impact activity under extreme conditions

Examples of high impact activities are running off-leash, playing ball with an owner, and playing off-leash with other dogs.

## Step 2: Follow Daily Recommended Feeding Guidelines

Low Activity OR Overweight	1-2% of weight
Moderate Activity, Ideal Weight	2-3% of weight
High Activity OR Underweight	3-4% of weight

## Step 3: Find Ounces to Feed Per Day From Chart

Current Weight	Percent of Total Daily Feeding						
	1.0%	1.5%	2.0%	2.5%	3.0%	3.5%	4.0%
20	3.2	4.8	6.4	8.0	9.6	11.2	12.8
30	4.8	7.2	9.6	12.0	14.4	16.8	19.2
40	6.4	9.6	12.8	16.0	19.2	22.4	25.6
50	8.0	12.0	16.0	20.0	24.0	28.0	32.0
60	9.6	14.4	19.2	24.0	28.8	33.6	38.4
70	11.2	16.8	22.4	28.0	33.6	39.2	44.8
80	12.8	19.2	25.6	32.0	38.4	44.8	51.2
90	14.4	21.6	28.8	36.0	43.2	50.4	57.6
100	16.0	24.0	32.0	40.0	48.0	56.0	64.0
110	17.6	26.4	35.2	44.0	52.8	61.6	70.4
120	19.2	28.8	38.4	48.0	57.6	67.2	76.8

## Other Considerations:

- Generally, larger dogs require less energy (kcal) per lb body weight than do smaller dogs.
- Pregnant/nursing dogs have MUCH higher energy requirements; consult your vet for details.
- Most importantly, every dog is unique and has slightly different nutritional requirements, so adjust accordingly. The Albright's team is always happy to assist if you have questions!

## What About Puppies?!?

Estimated Adult Size	Puppy Recommended Daily Feeding Amount			
	Age of Puppy (months)			
	2-3	4-6	7-9	10-12
Up to 10 lbs	2-4 oz	6-8 oz	5-7 oz	5-7 oz
Up to 20 lbs	6-10 oz	12-16 oz	10-14 oz	10-12 oz
Up to 50 lbs	10-16 oz	18-24 oz	16-22 oz	18-22 oz
Up to 100 lbs	16-22 oz	26-34 oz	32-36 oz	32-38 oz
over 100 lbs	34-40 oz	46-52 oz	44-54 oz	50-58 oz
