

# Cascade 3000 Bidet Seat

# Why Buy A Bidet?

## Health & Hygiene

Toilet paper allows small amounts of waste and bacteria to remain on the skin, which can lead to itching and irritation. Bidets, on the other hand, gently and effectively wash away residue, leaving you feeling fresh every time. By improving hygiene, bidets reduce the risks of urinary tract infections, protect delicate skin, and make using the restroom more pleasant.

## Personal Independence

The convenient, hands-free bathroom experience that bidets provide is ideal for individuals with cognitive difficulties or mobility limitations that make wiping challenging or painful. Because the bidet seat does all the work of cleansing and drying, it significantly reduces the amount of assistance needed to use the restroom and enhances personal independence.

## Medical Advantages

Bidets offer a gentle cleanse, making them an ideal choice for individuals with a variety of health conditions, including hemorrhoids, ALS, Crohn's Disease, constipation, and after certain surgeries. The Cascade 3000 bidet seat includes an oscillating spray option that gently stimulate the bowels and an air dryer that eliminates the need for abrasive toilet paper.

### **Safety & Convenience**

Bidets are designed to make using the bathroom safer and easier. They reduce fall risks since no bending or wiping is required to get clean, and some, like the Cascade 3000, feature built-in nightlights that make low-light restroom trips less hazardous, seat sensors that prevent the unit from operating unless someone is sitting on it, and sterile wash water that automatically cleans the bidet's nozzles after each use.

### **Economic Benefits**

Bidet seats help reduce or completely eliminate the need for toilet paper and expensive wet wipes, and many even come with power saving modes that lessen electricity consumption. These features add convenience to your bathroom routine while also keeping your wallet happy.

### **Environmental Impact**

By reducing or eliminating reliance on toilet paper and wipes, cutting down on electricity consumption, and conserving water efficiently, bidet seats provide an environmentally friendly way to stay sparkling clean.

# Cascade Bidet 3000

## CLEANING FEATURES

- Stainless steel, 2-in-1 nozzle is durable and hygienic

- Simple catch plate installation and quick release feature make cleaning the seat easy
- Energy saving mode reduces electricity consumption
- 4 year full warranty
- Comes in elongated and round sizes
- Available in white

# Key Features

## SITTABLE LID

Most bidet lids are unable to support the weight of an adult due to the delicate hardware housed within the seat's outer casing. The Cascade 3000 is different! In contrast to its competition, the Cascade 3000 features a sittable lid that can safely support up to 300 lbs. If you're used to sitting on your toilet lid for activities like clipping toenails or helping someone bathe, you'll love the convenience offered by the Cascade 3000's strong sittable lid.

## STAINLESS STEEL NOZZLES

The Cascade 3000's spray nozzles are crafted from high-quality, long-lasting 100% stainless steel. Unlike plastic or aluminum, stainless steel resists microbe growth, making it the ideal choice for bidet nozzles. Furthermore, the Cascade 3000's stainless steel nozzles automatically rinse themselves after each use with sterile water for optimum hygiene and peace of mind.

### VERSATILE DESIGN

The Cascade 3000's versatile design makes it compatible with both one and two-piece toilets, and unlike many seats on the market today, it's even able to fit on French curve toilets. For additional convenience, the Cascade 3000 is available in round and elongated seat styles, and its sleek, streamlined silhouette is designed to seamlessly blend with your existing bathroom décor.

### CONTROL PANEL OPTIONS

Operating the Cascade 3000 is easy thanks to its user-friendly wall mountable control panel, which is available in two sizes depending on your needs and preferences. The larger control measures **6.75" x 4.78"**. Both its size and layout make it a good option for anyone with vision or dexterity difficulties. The smaller control measures **2" x 5.25"** and features flat buttons along with a screen to display chosen options.

## FUN FACTS ABOUT TOILET PAPER

- We use an average of 57 sheets of toilet paper a day!
- Natural color of toilet paper is brown. (white toilet paper is bleached)
- It takes about 384 trees to make the toilet paper that one person uses within their lifetime.
- Approximately 810 rolls of toilet paper would be produced from a single tree.
- The daily production of toilet paper is about 83,048,116 rolls per day.
- On average, a household uses a roll of toilet paper in approximately 5 days.
- 0.1 gallon of water from a bidet can eliminate the need for toilet paper for each toilet use.
- Water is a better solvent than paper.
