→ Key Benefits:

- **Size:** ZARGES is a market leader with more usable internal volume per cubic foot and is easily stackable
- **Weight:** Aluminum delivers excellent durability and weight savings in a smaller footprint
- **Impervious to elements:** Case withstands temperature range of -238° to 302° F; UV, water, weather and corrosion resistance
- Will not warp or crack
- Provides maximum EMI & RF protection
- Available in custom sizes

→ K420 Overview:

Tools or sensitive devices, servicing and installation equipment, important work documents or high-quality components – a ZARGES K420 box can hold literally anything. Safe, clean and protected.

→ Why Aluminum is Superior to Plastic

Extremely lightweight, very high strength to weight ratio.

Easy to customize and maintain finishes. 100% Recyclable.

Magnetically neutral, excellent conductor of electricity and heat.

High temperature range without deforming (-238° to 302°F).

Impervious to UV, weather, wind, rain, water and corrosion.

Very strong, resistant to shattering upon impact.

ZARGES has nearly a century of experience protecting valuables the world over with its exceptional aluminum cases and rack mount systems. Saving weight and space is critical in logistics and nothing performs better than aluminum and nobody does aluminum better than ZARGES. Aluminum is not affected by the elements like plastics and other composite materials. Wherever the mission, whatever the challenge... you can count on the durability of ZARGES® quality aluminum cases to exceed the need.
