

# Adapt Wing

Adapt Wings are optional and can be added to enlarge a stand's upper tier. If upper tier gear is especially heavy, we recommend Adapt Wings in the "kickstand" position.

# Adapt Wing TALL

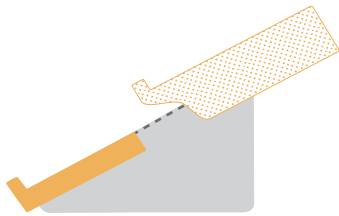

KVgear

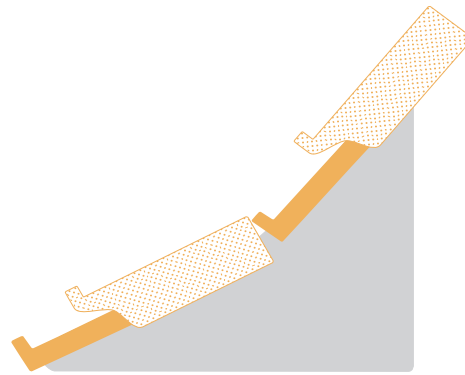

Adapt Wings TALL can be added to only a select few stands. In some cases Adapt Wings in the "kickstand" position might be necessary.

# Expansion Shelf LARGE

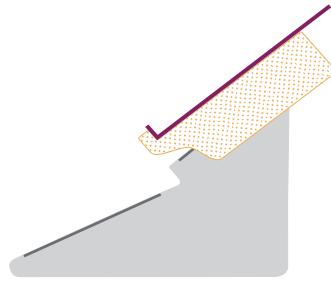

Adapt Wings are necessary when the shelf overhangs the back of a stand by a large amount. In cases where a stand will be especially top-heavy, additional Adapt Wings are needed in the "kickstand" position for extra stability.
