Subject to the above - The defective part will be repaired / replaced free of charge for labour or materials, at our discretion & option, provide that:

The unit is returned at your cost to our Authorized Service Centre along with the stamped and signed Cash Memo and Warranty Card.

The unit is installed, used and maintained strictly in accordance with the instructions provided.

The unit is not opened or tampered with by anyone except our Authorized Service Centre or technician.

CONSEQUENTIAL DAMAGE

Liability for consequential loss or damages is neither accepted nor is it implied. The warranty extended herein is in lieu of all implied conditions and warranties under the law and is confined to the repair or replacement of defective parts and does not cover any consequential or resulting liability, damage or loss. The warranty in no case shall extend to payment of any monetary consideration whatsoever or the replacement or return of the products as whole, liability for consequential loss or damage is neither accepted nor is implied.

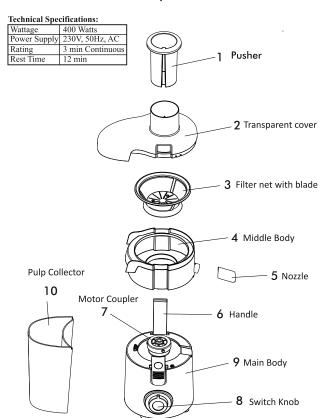

4. SERVICE AND REPAIRS

Please get the product repaired only from our nearest Office, Dealer or Customer service centre. This warranty is confined to the repair or replacement of defective parts. Any expenses incurred on collecting and returning the product to the customer and/or on the service personnel who will visit the customer, such as to and fro conveyance, incidentals etc., shall be borne by the customer.

Please note that this warranty is issued subject to the jurisdiction of the competent courts in Mumbai INDIA only. To avoid unnecessary repairs, please study the instruction manual carefully before operation.

CHECK LIST / DESCRIPTION

GENERAL OPERATING PRECAUTIONS

- 1. Connect motor unit to a 220-230 volt AC, 50 Hz supply.
- 2. Before using, put the machine on a strong table board and operate as per the instructions given in this manual only.
- 3. Before use, there may be slight peculiar smell and spark this is normal. After motor works for a short period, the above phenomenon will disappear.
- 4. Before operating the juicer, always switch on the juicer momentarily (for one or two seconds) to see if everything is in place and it is running smoothly.
- 5. Do not use wet hands while operation the machine.
- 6. Do not open the cover while extracting juice. If power supply is on, do not put your hand or any other object into the feeder tube.
- 7. Do not immerse the motor unit, plug or cord in water or any other liquid.
- 8. Do not use fingers for pressing fruits or vegetable, use the pusher.
- 9. Switch off the machine; unplug the cord before cleaning and when not in use.

1

- 1. Connect motor unit to a 220-230 volt AC, 50 Hz supply.
- 2. Before using, put the machine on a strong table board and operate as per the instructions given in this manual only.
- 3. Before use, there may be slight peculiar smell and spark this is normal. After motor works for a short period, the above phenomenon will disappear.
- 4. Before operating the juicer, always switch on the juicer momentarily (for one or two seconds) to see if everything is in place and it is running smoothly.
- 5. Do not use wet hands while operation the machine.
- 6. Do not open the cover while extracting juice. If power supply is on, do not put your hand or any other object into the feeder tube.
- 7. Do not immerse the motor unit, plug or cord in water or any other liquid.
- 8. Do not use fingers for pressing fruits or vegetable, use the pusher.
- 9. Switch off the machine; unplug the cord before cleaning and when not in use.
- 10. To ensure longer life of the machine, over temperature protective device is mounted in the motor. If the motor works for a long time or overloaded or exceeds warning temperature, power supply will automatically cut off. After the motor stops, pull out plug of power supply, wait for the motor to cool down (about for 30 min.)
- 11. Please do not leave the juicer unattended while operating the machine,.
- 12. After operation, first pull out the plug of power supply and then pour the juice.
- 13. This machine must not be used for other purposes than indicated in this manual. It is not a commercial juicer and cannot be used for commercial purposes.
- 14. Handle the cutter blade carefully while washing it is very sharp.
- 15. Handle the cutter blade carefully; do not drop it as it is very delicate and expensive with very minute holes. Please wash it thoroughly and make sure the holes are not blocked. Use a brush for the same.
- 16. If the motor stops or smoke comes out switch off immediately and contact the nearest authorized Rico service centre, a list of which is attached.
- 17. Do not operate the motor for more than 3 minutes continuously at a time. After operating it for 3 minutes continuously, please let the juicer rest for 12 minutes before using again.
- 18. Do not open the juicer parts while the juicer is connected to the power supply
- 19. Do get this juicer serviced at least once in 2 years from an authorized service centre.
- 20. Keep the product away from children and people who are incapable of using the juicer.

 Before the first use please remember to clean the juicer as explained in the Instruction given hereunder

CLEANING INSTRUCTIONS JUICER UNIT:

- 1. Open the Lock (Handle) clamp –press the upper potion of the transparent cover with your hand, then slide the handle outwards
- 2. Remove transparent cover unit pull it upwards.
- 3. Remove the filter net unit by pulling upwards.
- 4. Remove the middle body by pulling upwards.
- 5. Wash the above units.
- 6. Now assemble the whole juicer in the reverse way.

MOTOR UNIT:

- 1. Unplug the motor unit from the power source
- 2. Do not wash the motor unit with water only wipe with a moist cloth.

HOW TO USE THE JUICER

1. Wash all units as explained above before every use.

- 2. Keep pieces of fruits and vegetables handy small enough to pass through the tube portion of the cover.
- 3. The feeder tube is quite large and can accommodate medium size fruits without the need to cut them. It's very easy and quick.
- 4. Switch on the juicer momentarily (for one or two seconds) to see if everything is in place and it is running smoothly
- 5. If all parts are running smoothly, switch on the juicer.
- 6. Put the pieces of fruits or vegetable in the tube and press them very lightly with the pusher.
- 7. The juice comes out in a smooth flow into the glass and the pulp is automatically collected in the pulp collector.
- 8. Go on extracting juice continuously however do not run the juicer unnecessarily when not required.
- When the pulp container is full stop the machine, empty the pulp reassemble the part and continue the process of juicing.
