

WTF SERIES | TIME CLOCK SEDIMENT FILTERS

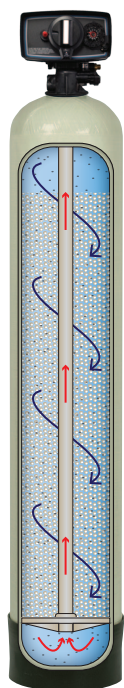

BENEFITS

- *Removes particles from water and treats cloudy or hazy water*
- *Long media lifetime*
- *Avoids having to change a sediment filter on a regular basis*
- *Less pressure loss and finer filtration*
- *Larger capacity than a sediment cartridge*
- *Great for well water systems*

WTF SERIES | TIME CLOCK SEDIMENT FILTERS

FEATURES

- Pre-loaded with hyper-filtration media
- Fiberglass tank will not rust, durable design and efficient operation
- 12 Day Fleck 5600 Valve
- High flow bypass valve included
- Filters down to 10 microns
- Warranty
Fiberglass Tank: 10 years
Control Valve: 3 years
Timer/Motor: 3 years

TURBIDITY LEVELS

Up to 10 ntu	Slightly Cloudy
10 -100 ntu	Cloudy
100+ ntu	Very Cloudy
Recommended range: Up to 5 ntu	
Turbidity levels above 100 ntu can be an indication of various emerging water quality problems such as infiltration of surface water or pipe corrosion. A well inspection is recommended in these situations.	

MEDIA (Included)

Filtration Media

Filtration media's lifetime is unlimited but can become "caked up" and will need to be replaced

REPLACES

WTF15AG-V

VORTECH PLATE

Environmentally friendly, reduces backwash requirement by up to 30%.

Designed for over 6,500 lbs. load capacity.

High flow design maximizes today's high efficiency control valve technology.

FLECK 5600 VALVE

1-12 day time clock valve, simple to adjust and easy to service with quick access to all internal components.

Stainless steel bypass valve.

Regenerates at pre-set intervals.

SPECIFICATIONS

Model	Capacity Cu. Ft.	Tank Size Inches	Service Flow Rate	Backwash Flow Rate	Gal. Per Backwash	Pipe Size In/Out
WTF15AG-V	1.5	10" x 54"	6 gpm	5.0 gpm	150	1"
