

VELA TANGO 100ES/S

A CHAIR THAT WILL GROW WITH YOU

VELA Tango 100S
Height adjusted using gas

VELA Tango 100ES
Height adjusted electrically

VELA Tango 100ES/S is a future proof chair for teenagers with special needs. The chair gives a high degree of stability, safety and focus on ergonomics and quality

SMART DESIGN

The VELA Tango 100ES/S smart design makes it ideal for home and for school. The chair can easily fit beneath a work surface, and its discreet design takes up very little space, whilst at the same time maximizing the space beneath the castors to allow for foot movement, for those wishing to move the chair unassisted. Large ball bearing encased castors assist in this movement, ensuring that the chair can travel over small thresholds with minimal effort.

SAFETY IS KEY

Activate VELA's unique braking system to lock the castors. Instantly the chair is safe to enter or exit, either forwards, or by lowering either or both arms to side transfer using the 90 degree rotation lock system.

ONE CHAIR THAT KEEPS GROWING

With the unique CY bracket you can change and fix the angle of the backrest, and it allows the seat depth of the chair to be adjusted as the child grows.

Once the full seat depth allowance has been "Grown Into". Simply order a larger seat pad and backrest, a chair that can be used right into adulthood.

HOW LOW WILL YOU GO

The superior electric or manual height adjustment range on the chair, will take you as low as 40 cm seat height, for infant and junior classroom use. Right up to a whopping 81 cm that can be used at science benches, and will also give ample reach to get to high shelves or kitchen cupboards.
