

# Butterfly Habitat

Our butterfly home serves as an essential feeding station in the summer and a cosy habitat in the winter for non migratory butterflies and beneficial insects

We all know we have to protect bees, but we must help our butterflies too! Since the 1970's, 80% of butterfly species have declined in the UK.

- ☀️ Dual purpose - a summer feeding station and over wintering habitat
- ☀️ Site in a sheltered sunny spot
- ☀️ Fill cup with Wildlife World butterfly food or over ripe fruit in the summer
- ☀️ Close up the tray in the winter
- ☀️ UK designed and manufactured from FSC® timber
