

Made from peat free, certified organic coir, our seedling pots and trays are a friend to the garden, a friend to the planet and keeps your plants happy and healthy too.

From our Plastic Free Gardening range, these coir pots are biodegradable, so perfect for seeds or cuttings. The growing roots will penetrate through the coir so the whole pot can be planted with no repotting required, causing minimal root disturbance.

- Natural certified organic coconut fibre and natural fairtrade rubber
- Ideal for seeds, seedlings, and cuttings
- No repotting required
- 100% natural, biodegradable and peat free
- Available in various sizes

We Care For Nature!
