

How to find your Reader's power

Print this chart at actual size (A4) for best result

- Print this chart for your simple test
 - The chart should be around 14 to 16 inches away from you
 - Continue until you reach a line which you can entirely read clearly
 - The number beside the line which you can read clearly is the reading glasses strength that suits you the best
 - Please discuss your doctor if you are not certain
-
