

# ANIGENE

Professional Surface Disinfectant Cleaner Concentrate

## Health and Safety

**Chemical resistant gloves, clothing and boots, along with chemical splash goggles are essential personal protective equipment when handling concentrated ANIGENE.**

**Once made into recommended dilutions, ANIGENE does not require additional protective measures.**

**If prone to allergies, continue to take protective measures.**

Safety data sheets and training materials are available at [byotrol.com](http://byotrol.com)

### Storage

Keep ANIGENE stored in closed containers and out of extreme temperatures and direct sunlight.

Keep away from oxidising substances, anionics, peroxides and acids.

Ensure containers are correctly labelled.

Keep out of reach of children and members of the general public.

Concentrated ANIGENE direct from manufacturer will have a 2 year shelf life, as shown on the container.

ANIGENE diluted by the user will have a 3 month shelf life when kept in a closed container, free from debris and contamination.

### Disposal and Accidental Release

Spillages can cause surfaces to become slippery.

Wash surfaces thoroughly after dealing with a spillage.

Do not release concentrate into drains.

Contain spillages with sand, earth or other suitable non-combustible materials.

Dispose of spillage waste to an authorised waste collection point.

Wear personal protective equipment when disposing of concentrate, or when containing spillages of concentrate.

Generation of waste product should be minimised. Waste diluted product can be disposed of by washing to sewers with at least equal volumes of water. The user's attention is drawn to the possible existence of regional or national regulations regarding disposal.
