Assembly and User Guide

RECESS

Make work happen from anywhere

Congrats

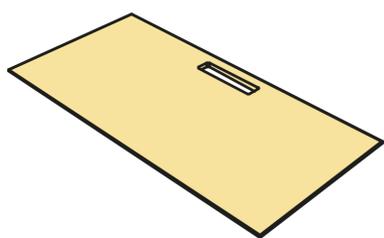

You are now the proud owner of your very own Single Desk.

Now let's get cracking with assembly - it shouldn't take you much longer than 30 mins!

Table Frame
Bolts

Flip the **Bracket** and **Beam** towards the floor, ensuring the eyelets are also facing downwards. Insert one end of the beam into the bracket as shown. Use two **Table Frame Bolts** to attach. Repeat on the other end. The Large size desk contains two beams so repeat the above step twice.

TIP: Your Table Frame may arrive preassembled. If so, move to Step 2.

Using four **Table Frame Screws** per Leg, attach the **legs** to each angled opening in the Bracket.

Table Top
Screws

Grab a mate and place the **Table Top** on the ground with the bottom facing upwards. Take your assembled frame and flip it onto the desk. Use the **Table Top Screws** (see circled locations below) to affix the frame in place. Large Desks naturally require more screws.

Large Desk

TIP: Use the pre-drilled holes on the corners of the desk to center and secure your desk to the base. The center screws are optional, and can be screwed directly into the table top.

Please note: The pilot holes have been positioned to suit the Standing Desk as well. If you cannot locate pilot holes for your Single Desk Frame, the frame simply needs to be positioned in the middle of the Table Top, and the screws can be drilled directly into the top.

With help from your mate, flip your new Recess Desk upright.

Tip: Time to head to the pub for a bevvv - you've earned it!
