

SlideDriver™

**Premium Security
and Reliability**

The Premium Slide Gate Operator

The ultimate in quality and reliability

Decades long life and low maintenance

Move the longest, heaviest gates up to 20,000 lb

Secure, heavy duty chassis - no visible moving parts

1 – 3 ft/s gate travel. Emergency Fast Operate at 3 ft/s

Dual gate, sally port or sequenced gate integration

for Industrial and High Security

Easy system troubleshooting
with onboard event log

Field programmable to
specific site requirements

UPS models retain full
functionality during an AC
power outage

Extreme
temperature range
without heater

Real time system
security alerts

5-year warranty

A Model for Every Site

* 3,000 ft/hr expected duty cycle. The operator's normal duty cycle and the actual number of gate cycles available from battery depends upon gate resistance to travel, cycle length, battery size, state of charge and health, ambient temperature, accessory power draw and frequency of gate cycles during power outage.

** SlideDriver 200 UPS has a 2,000 ft/hr (610 m/hr) expected duty cycle. Actual duty cycle depends on site specific conditions and gate configuration.

***Refer to Installed Options on pricing for all 50Hz voltages, which are special order.

† 115V DC Power Supply requires a 30A branch circuit. Choose voltage with care as chargers are not field convertible.

To enable fully automatic operation, all SLIDE gate operators require a minimum of TWO monitored external entrapment protection sensors (one for each direction) to protect entrapment zones in both the open and close direction of travel. Visit hysecurity.com/gatesafety for more information on UL 325 standards and gate safety.

Powerful, Rugged, Continuous Duty

SECURE UNI-BODY WELDED CHASSIS constructed with rigid 12 gauge sheet metal and protected with ultra durable polyester powder coat over zinc plating for an enduring attractive finish.

FIELD PROGRAMMABLE SMART TOUCH CONTROLLER provides the ultimate in configurability and system troubleshooting.

ELECTRICAL ENCLOSURE

Smart Touch Controller keypad & display

EXTREMELY RELIABLE HYDRAULICS contain only one gallon of high performance hydraulic fluid. Operates in extreme temperature range.

INDUSTRIAL GRADE COMPONENTS ensure extremely low maintenance and exceptionally long life.

Enclosed, Secure Pinch-Wheel Drive

- No exposed chain
- Long life
- Field and factory proven under brutal conditions
- Simple, quick and inexpensive replacement
- Two year limited warranty

AdvanceDrive™ Wheel

Program and Troubleshoot

- Microprocessor-based (Non-PLC)
- 21 field configurable inputs
- 3 field configurable user relay outputs. Hy8Relay™ option provides 8 additional user relay outputs
- 4 plug-in Hy5B™ vehicle detector sockets
- RS-232, RS-485 and HyNet™
- Date and time stamped fault logs, errors and security alerts
- PC software simplifies configuration and troubleshooting using Smart Touch Analyze and Retrieve Tool (S.T.A.R.T.).
- Unparalleled power surge/lightning strike protection
- Easy one wire input terminal connections and common wire buss

Smart Touch Controller

Corrections

Correctional Facilities Model

SlideDriver Correctional offers three high security lock options and a heavier, 10-gauge steel cover for added protection. HySecurity Correctional Facility gate operators come standard with all software needed to interface with common options and interlocks used at correctional facilities, such as gate position outputs, interlock capability for sally ports or sequenced gates, and multiple relays for an external solenoid lock or other customizable options.

- **Highest security.** Heavier, 10-gauge cover with a high security lock for added protection. Easy to program for sally port, external lock mechanisms, and gate position indicator. Available with an optional internal deadbolt gate lock.
- **Three lock options.** Deadbolt, padlock and T-lock
- **Easy to integrate.** Shipped ready to interface with common options and interlocks used at correctional facilities, such as gate position outputs. Has interlock capability for sally ports and an interface relay to control an external solenoid lock.

Applicable Models:

SlideDriver 30F-C, 30F-C UPS,
30F-CM, 40-C, 40-CM, 40-C UPS,
50VF2/3-C, 50VF2/3-CM, 80-C,
80-C UPS, 200-C, 200-C UPS

Solenoid lock is not available with UPS models

Choose your lock:

Deadbolt Prep:

Plate is designed to accommodate a 1010 deadbolt lock

Internal Solenoid Lock:

Deadbolt lock employs a 3/4 inch (19mm) stainless-steel lock pin to lock the gate in the closed position

Padlock Prep:

Plate is designed to accommodate a standard padlock

T-Lock:

Option includes the T-lock

High Security, Custom Applications

Modular

SlideDriver Modular remotely locates all hydraulics and controls in a separate lockable enclosure for sites requiring unique mounting, highest security, blast mitigation or areas requiring noise reduction.

- **Highest security.** Threat of vandalism or unauthorized operator programming is greatly reduced with the Smart Touch Controller, electric motor assembly and pump pack remotely located in the HydraSupply. The only parts remaining in the operator are drive wheels, hydraulic motors and limit switches.
- **Blast mitigation.** In factories or other areas where gases or airborne particulates could pose an explosive danger, modular SlideDrivers remotely locate most electrical components, protecting against possible ignition of combustible materials.
- **Quiet.** Choose modular for noise-sensitive sites.

Remotely Located Enclosure

* Drive unit with two hydraulic motors shown; drive unit with four hydraulic motors is similar.

** The optional heater requires a separate electrical conduit (not shown) between the control box and drive unit.

Applicable Models:

SlideDriver 15-M, 15-M UPS, 30F-M, 30F-CM, 30F-M UPS, 40-M, 40-CM, 40-M UPS, 50VF2/3-M, 50VF2/3-CM, 80-M, 80-M UPS

Remote Location:

The Pump/Electrical Enclosure (shown post-mounted) can be on either side of the Drive Unit. It can also be wall-mounted and/or located remote from the Drive Unit.

HydraSupply enclosure may be located up to 100 ft (30.5 m) from operator. For longer than 100 ft runs, or extremely cold climates, call HySecurity for hose specifications.

Move Up to 20,000 lb Gates

SlideDriver 80 and 200

- **Move large, heavy gates** up to 20,000 lb (9,072 kg)
- **SlideDriver models 80 and 200** utilize HySecurity's XtremeDrive™ system for maximum pull force
- **SlideDriver 200** operates with a double-wide, four wheel drive
- **Retain full functionality during an AC power outage** using HySecurity's advanced DC Power Supply with HyCharger DC™, a powerful 50A three stage charger, designed and built for continuous duty and long battery life
- **Seamless synchronization** with all HySecurity operators for dual gate, sally port or sequenced gate integration

SlideDriver 200 operates crash gate at power substation

SlideDriver 200

XtremeDrive™ System

Patent Pending

Another HySecurity Innovation

- **The XtremeDrive System** comes standard with SlideDriver 80 and 200 and is optional with all models
- **Heavy gates operate more reliably** in severe weather including conditions where excessive ice, snow, blowing salt, sand and dust build up on the drive rail.
- **Provides maximum pull force** and traction for exceptionally hard to move gates.*
- **Cogged lower wheel** engages a matching cogged rack and increases traction the entire length of drive rail under the worst conditions.
- **Easy retrofit.** Replace smooth bottom wheel with XtremeDrive wheel, and add rack to existing drive rail. XtremeDrive wheel fits standard SlideDriver wheel mounts.

* HySecurity's XtremeDrive System does not replace an improperly adjusted gate operator or a poorly maintained or installed gate. Ensure your operator and gate are installed and maintained according to the manufacturer's guidelines before retrofitting XtremeDrive. If you are retrofitting a SlideDriver with XtremeDrive you will have to raise the drive rail 1/4" to 1/2".

UPS Backup Option - AC/DC

Maintain security even after AC power loss

HySecurity UPS backup systems keep vehicle barriers and access control points alive and cycling after AC power loss.

DC Power Supply with HyCharger DC

A powerful 50A three stage charger, custom built for continuous duty and long battery life.

- Redundant chargers increase security & reliability
- Burst mode power when needed
- Easy retrofit for existing DC power supply
- Duty cycle: continuous
- Input power: 115, 208/230 VAC; 50/60 Hz
- Fast, min 2-hour recharge
- Wide temp rating: -40° to 70°C (-40° to 158°F)
- Climate controlled heating and cooling

SlideDriver 40 UPS at aviation facility

AC Power Supply w/HyInverter AC

Back up ALL HySecurity Variable Frequency (VF) operators including SlideDriver 50VF2/3.

- AC Power Supply field retrofits competitor 1 hp operators
- Install anywhere on branch circuit, from operator to protected facility
- Quick power transfer: ½ AC cycle
- Input power: 208/230VAC, 50/60Hz, single phase
- Fast, min 6-hour recharge
- Wide temp rating: -40° to 50°C (-40° to 122°F)
- Climate controlled heating and cooling

SlideDriver 50VF2/3 at Data Center

Accessories

Base extension

Raise SlideDriver up 12 inches for additional conduit accessibility and operator flexibility.

XtremeDrive™ System

Handle exceptionally difficult to move, large or heavy gates with the XtremeDrive rack and drive wheel system.

Hy5B™ Detector

Trouble-free configuration allows extensive system diagnostics and recording of all loop fault conditions.

Heater Kit

Maintain the reliability of the SlideDriver even in icy and snowy conditions with a heater kit.

Snow brush and scraper kit

Reduce snow and ice buildup. Allow the wheels to make direct contact with the drive rail to reduce slippage.

Internal solenoid kit

As a standard specification on correctional sites, the internal solenoid lock provides the additional security that these sites demand.

Fire Release

Fire and emergency access lock box provides fast gate entry in case of emergency.

Photo Eye Kits

When safety is a priority, photo eyes are the solution. Detect pedestrians or cars before they become entrapped.

Radio Receivers & Transmitters

Remotely operate your gate.

ASO Edge Sensors

Wraparound square, round or channel mount with 10k ohm resistor.

Hy8Relay™

Add 8 user relays to your HySecurity operator. Integrated with Smart Touch controller using S.T.A.R.T.

HyNet™ Gateway Integration

Provides intelligent perimeter control with real time connection to a HySecurity operator that communicates breach and system malfunctions via built in web interface, Web Services API or SNMP.

Amber Strobe Beacon, 24VDC

Add 360 degrees of visible warning during gate operation.

Push Button Station, 2 or 3 Button

Manually control gate operator through control station from a distance by pushing a button.

Clock Timer

Seven day, 24 hour timer.

System Design Support

SlideDriver™ Gate System

SlideDriver gate system with required and optional accessories.

We help hundreds of specifiers successfully design highly complex automated gate systems

Our highly experienced specification professionals save you time by helping you identify what components your project needs, then recommending latest technology and best solutions for you and your client. As Certified Automatic Gate System Designers, their years of hard won experience and knowledge will guide you through industry safety standards to help ensure your project's compliance. Their total immersion in this dynamic and growing industry safeguards your project's design and execution success.
