

# VEHICULAR GATE HARDWARE

SLIDE & SWING

Apartment Complex/Gated Communities • College Residents Halls •  
Mixed Use Buildings • Residential • Commercial/Industrial • Parking •  
Self Storage • Maximum Security

ACCESS CONTROL SOLUTIONS

ACCESSORIES

**A End Catch**  
1204-004 • Designed for gates with 2-inch frame

**B 3 Inch Guide Rollers**  
1204-120 Single  
1204-122 Dual  
1204-005 3-Inch replacement roller  
• Use two for 6-inch roller

**B 6 Inch Guide Rollers**  
1204-121 Single  
1204-123 Dual

**C Chain Idler Assembly**  
2600-818 • Use with rear-mount slide gate operators.  
Works with #40 and #41 chain

**D Replacement V-Wheels**  
1201-004 • 4-inch UHMW Sleeve Bearing 500 Lb Max Wt  
1201-006 • 4-inch UHMW Sealed Bearing 750 Lb Max Wt  
1201-016 • 4-inch Steel Sealed Bearing 1500 Lb Max Wt  
1201-000 • 6-inch Steel Sealed Bearing 2500 Lb Max Wt

**D V-Wheel Assemblies**  
1201-102 • 4-inch UHMW Sleeve Bearing 500 Lb Max Wt  
1201-105 • 4-inch UHMW Sealed Bearing 750 Lb Max Wt  
1201-117 • 4-inch Steel Sealed Bearing 1500 Lb Max Wt

**D 4 Inch Tandem V-Wheel Assemblies**  
1201-012 • 4-inch UHMW Sealed Bearing 1500 Lb Max Wt  
1201-010 • 4-inch Steel Sealed Bearing 3000 Lb Max Wt

**D 6 Inch Tandem V-Wheel Assembly**  
1201-210 • 6-inch Steel Sealed Bearing 5000 Lb Max Wt

SLIDE GATE

**Pivot Point**  
for heavy duty gates

**Tandem 6 inch**  
Steel V-wheel assembly

**Sealed Bearings**  
Maximum load bearing  
with excellent durability

# SWING GATE ACCESSORIES

ACCESSORIES

## A Ball Joint Pivot Assembly

6500-490

Used to connect the swing gate operator arm when the operator has been installed horizontally level and the gate opens on an uphill or downhill slope. The ball joint will stay at the same angle as the gate bracket during gate cycling while the operator arm remains swinging horizontally level.

## B Torsion Rod Assembly

1203-084 Assembly includes one (1) torsion rod. Add up to five (5) more as needed for counter-balance.

2600-299 Additional Torsion Rods

An un-level swinging gate **MUST** be restrained from opening or closing too quickly (gate runaway) when not connected to the gate operator. The torsion rod assembly provides a counter-balance to prevent gate runaway and relieves pressure on the gate operator.

- Counter-balances uphill swing gates
- Includes top bracket, bottom bracket and one (1) torsion rod
- Up to five (5) additional torsion rods can be added

## C Flange Bearing Hinge

1200-009 3000 Lb Weight Capacity

1200-010 Replacement Bearing

- Zert grease fitting
- Includes mounting bracket and hardware
- Two required per gate (top, bottom)
- Designed for use with 2" gate frame

## C Sealed Bearing Hinge

1200-019 2000 Lb Weight Capacity

1200-039 3000 Lb Weight Capacity

- Includes mounting bracket and hardware
- Two required per gate (top, bottom)
- Designed for use with round or square gate frames

SWING GATE

## Heavy Duty

Flange bearing hinge assembly for heavy wrought iron gates

## Sealed

ball bearings

## Pivot Arm

Ball joint assembly for opening gates on an uphill or downhill slope

## SLIDE GATES WHEELS

# SLIDE & SWING GATE HARDWARE

## Slide Gates | UHMW and Steel Wheels

Available with sleeve or sealed roller bearings. Four inch and six inch sizes of either machined steel or UHMW. Maximum gate weights of up to 5000 lbs. V-Wheel assemblies include mounting bracket for 2x2 bottom rail. Tandem assemblies include pivoting mounting bracket. Tandem wheel assemblies provide superior performance for heavy gates by distributing the gate weight across four wheels instead of two.

## Swing Gates

### Ball Joint Pivot Assembly

Used to connect the swing gate operator arm when the operator has been installed horizontally level and the gate opens on an uphill or downhill slope.

### Torsion Rod Assembly

An un-level swinging gate **MUST** be restrained from opening or closing too quickly (gate runaway) when not connected to the gate operator. The torsion rod assembly is used on un-level swinging gates that open on an uphill slope. It allows up to six "Twisting" torsion rods that will counter-balance the gate to keep it from opening or closing too quickly. It also relieves the pressure on the gate operator when the gate is in the downhill position.
