

# Patriot SR

Patriot Series - Short Range Reader

## Key Features:

- Read Range: 1' to 7'
- Wiegand
- Supports 26-bit Wiegand Format
- LED Indicator
- Variable 12-24VDC Input Voltage
- Frequency Hopping 902 - 928mHZ

• Detailed Specifications on back

## Communication

The Patriot SR series supports a variety of communication protocols that includes Wiegand .

## Weather Resistant Housing

This rugged IP65 rated housing is made to withstand even the most demanding weather conditions from -20° to +70 ° F.

## High Performance, Short Range

The TRES Patriot SR is a high performance UHF short range reader for 1' - 7' operations, software adjustable. The reader operates in frequency range of 902MHz ~ 928MHz, designed to read EPC, gen2 protocol credential/tags. The reader can be widely applied in many RFID applications such as controlled perimeter access and building access, along with industrial production process controls.

## Tech Support

We also offer comprehensive U.S. based tech support that can deliver powerful first contact solutions for all your tech support needs.
