

How to identify your KL1000 Classic

Locks manufactured after April 2014 now have Single Code Entry (default) and the option to have Double Code Entry when in Public Use function.

You can identify when your lock was manufactured by looking at the product sticker on the back of your lock, it will indicate the date in reverse i.e A 20140410 (10/04/2014).

⚠ Note: The KL1000NC1F is reaching its end-of-life and will be decommissioned as of the 24th February 2019.
