

ODC-56 SERIES

OVERHEAD DOOR CONTACT WITH FIXED MAGNET

- UL and ULC listed
- 2" operating gap
- 24" stainless steel armored cable
- Hermetically sealed reed switch

Application

The ODC-56 Series Overhead Door Contacts are exclusively designed for rugged high traffic installations. The reed switch is hermetically sealed with a PVC shock absorber enclosed within a solid aluminum housing. Installation wires are protected in a 24" stainless steel armored cable. The magnet is enclosed and protected in a heavy duty aluminum housing.
