Steel and Aluminum Construction

Trust the Made in the USA quality and craftsmanship to protect your employees and pedestrians from hazardous situations at a moments notice.

- Rugged aluminum expansion frame
- Durable, high gloss powder coated finish

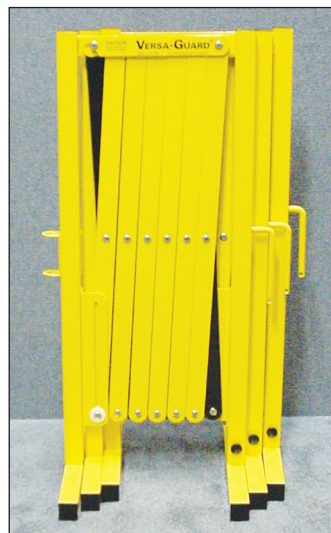

Maximum Strength. Durable Construction. Highly Portable.

VERSA-GUARD's durable steel and aluminum construction can stand up to the toughest conditions. Weighing only 25 pounds, it's highly portable and designed to carry like a toolbox.

Easy to Add Sections

Carrying handle doubles as interlocking end posts so you can create custom, modular configurations without tools.

Easy to Use, Store and Move.

VERSA-GUARD easily expands and contracts. It can be ready for use in seconds and can be quickly packed away for future use.

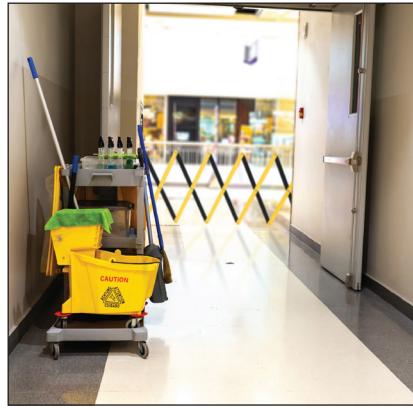

Endless Applications.

VERSA-GUARD is highly versatile and is the perfect safety barricade for anywhere.

- Airports
- Metro stations
- Hotels
