

Rothco Grid Fleece Pullover

Engineered with our innovative, four-way stretch design, the Grid Fleece Pullover keeps you warm and comfortable during any adventure while providing high-performance defense from the cold. The breathable grid fleece moves with you with utmost comfort as you tackle the great outdoors. **Staying Warm and Dry:** These fleece pullovers wick away excess moisture and sweat, swiftly transferring it to the top layer for a quick dry. This allows you to move freely without your clothes sticking to you. The stand-up collar insulates your body temperature by keeping the heat in and the cold out. **Comfortable Fit:** Constructed of a 93% polyester / 7% spandex blend, the grid fleece material stretches and flexes with your body for easygoing movement. The fleece shirt features raglan style sleeves and flat seams that sit comfortably underneath pack straps while hiking. **Built for the Outdoors:** The pullover fleece features a quarter length zipper closure with a chin guard for additional protection and a drop tail design for below-the-waist coverage. There is also a utility zipper pocket on the left chest for carrying small essentials. The Grid Fleece Pullover is great for active-duty personnel, outdoor enthusiasts, casual use, and more. **The Perfect Mid-Layer:** These quarter-zip pullovers fit comfortably underneath vests, jackets, and coats, while also looking good when paired with our Diamond Quilted Cotton Jacket or Spec Ops Tactical Fleece Vest.
