

Product Specifications

Product number:	<i>HIS-0100</i>
Description:	<i>Human autoantibody against whole histones, buffered with 0.01M phosphate, 0.13 M NaCl, 0.02% NaN₃. This product shows anti-histone activity when tested by ELISA techniques. The titer obtained will vary with the test system. However, a dilution of 1:100 will show good reactivity by ELISA.</i>
Amount:	<i>2 ml</i>
Physical state:	<i>Lyophilized powder</i>
Manufacturing method:	<i>Single donor human plasma is delipidized and defibrinated, then the immunoglobulin fraction is precipitated and collected. Antibody concentration is adjusted for consistent lot to lot titer.</i>
Storage conditions:	<i>Store ≤- 0°C</i>
Instructions for use:	<i>Reconstitute with 2 ml deionized H₂O.</i>
Warnings:	<i>For research or further manufacturing use only. This product has tested negative against HBsAg antibodies, HBC antibodies, HIV 1 antibodies, HIV 2 antibodies and HCV antibodies. However, as with all human blood products, precautions against infection should be taken.</i>
