

Product Specifications

Product number:	<i>HSB-0100</i>
Description:	<i>Human autoantibody against SSB antigen, buffered with 0.01M phosphate, 0.13 M NaCl, 0.02% NaN₃. Shows only the SSB precipitate band when tested using double immunodiffusion against rabbit thymus extract (RTE-1000). Specificity is verified by identity of precipitation with CDC-AF reference serum. Titer will vary with test system; however, undiluted antibody shows a strong SSB precipitate band. Exhibits no reactivity at a dilution of 1:100 when tested against purified Scl-70, Sm, Sm/RNP, and Jo-1 antigens in an ELISA system designed to detect all IgG subclasses. Anti-SSA activity is detected in this ELISA system.</i>
Amount:	<i>2 ml</i>
Physical state:	<i>Lyophilized powder</i>
Manufacturing method:	<i>Single donor human plasma is delipidized and defibrinated, then the immunoglobulin fraction is precipitated and collected. Antibody concentration is adjusted for consistent lot to lot titer.</i>
Storage conditions:	<i>Store $\leq - 0^{\circ}\text{C}$</i>
Instructions for use:	<i>Reconstitute with 2 ml deionized H₂O.</i>
Warnings:	<i>For research or further manufacturing use only. This product has tested negative against HBsAg antibodies, HBC antibodies, HIV 1 antibodies, HIV 2 antibodies and HCV antibodies.</i>
