

Product Specifications

Product number: \$2-3000

Description: Purified monoclonal antibody against Hepatitis B surface antigen

Amount: 20 mg

method:

Physical state: Frozen liquid

Manufacturing Ascites fluid is collected from mice injected IP with a hybridoma cell

line producing monoclonal antibodies against Hepatitis B surface antigen. The resulting antibody is purified from the ascites fluid by

antigen. The resulting antibody is purified from the ascites fluid

Protein A purification.

Storage conditions: <-70 ℃

Instructions for use: Suitable for use in ELISA.

Warnings: For research or further manufacturing use only.

This product meets or surpasses Immuno Vision's specifications.
