NIGHT DIVING COURSE / DEEP DIVING COURSE:

ADVANCED DIVER CERTIFICATION

The Advanced Diver course is designed for all certified divers who wish to increase their understanding and enjoyment of SCUBA diving and have fun diving in the WNY area. Our Advanced Diver program gives you flexibility in choosing the dates for your dives. Just complete each of the five diving activities listed below and you will become an Advanced Diver! **Students must provide all Scuba Gear for each dive.**

We've had to make adjustments due to the Canadian Border being closed. Three (3) modules will be done in one (1) day (see schedule to the left) and we'll be doing our "Deep" Dives in Key Largo (November) during the '22 season. We'll watch the landscape of how things progress during the '22 season and if Canada opens with NO RESTRICTIONS, then we'll re-visit going back to Windmill Quarry. As of this moment though, we're operating under the assumption that this will not be the case in '22.

So contact Chris to learn more about our "revised" program this season at 716-837-3483.

DIP 'N DIVE SERVICE DEPARTMENT REMINDER

Part of being a good and responsible diver, isn't always related to what you do **IN** the water but what you do **ABOVE** and/or **BEFORE** you go diving. It is VERY important that you service your **LIFE SUPPORT GEAR** every year. This relates to your **Regulator** AND your **Buoyancy Compensator**. The BCD is the most commonly missed **LIFE SUPPORT** item missed during service but it is also one of the most important! You don't want to have issues with your BCD's Inflator Assembly because it's corroded due to being in Salt water and/or being in environments such as our local waters. If not taken care of, a BCD's Inflator assembly can self inflate, causing issues with the diver's buoyancy and/or worse can shoot the diver up to the surface.

Part of the advantage of buying your **LIFE SUPPORT GEAR** at Dip 'N Dive (as opposed to other shops or online), is that you get **FREE LIFETIME PARTS**. Based on manufactures recommendations of servicing your gear on a YEARLY basis, we have to be stricter with our **FREE LIFETIME PARTS** program as we're having some customers come in every 2-4 years for service with equipment that is SEVERLY corroded and/or damaged. So effective immediately, in order to maintain your **LIFETIME PARTS AGREEMENT** for your equipment, you must bring in your equipment (Regulator/BCD) on a yearly basis. This will be verified with prior year's records.
