

AEROTAPE RAPIDE

PROTECTIVE FILM-FREE ADHESIVE TAPE FOR HOUSE WRAP / VAPOUR BARRIER / ROOFING UNDERLAY

/// FIELDS OF APPLICATION

AEROTAPE RAPIDE adhesive tape is used to glue down and airproof AEROVAP vapour barriers, AEROMAX roofing underlay membranes and AEROPLUS house wraps, in overlapping areas and at the ends of sheets, around window frames and at entry points for technical ducts or elements of the frame. **AEROTAPE RAPIDE** is used to seal the joints between wooden panels (e.g. OSB) and can also be used to patch tears in a reliable and completely airtight manner, and to seal the joints between membranes and single points. This adhesive is composed of a special PE film combined with a strengthening mesh and is UV-resistant. Stretchable, flexible, usable without tools and tearable by hand, **AEROTAPE RAPIDE** guarantees a firm and durable bond of excellent quality and moisture resistance. Because **AEROTAPE RAPIDE** allows quicker fitting and better waste management. Product conforms to CSTB GS20: Systems for airproofing building walls.

Support	PE film base + strengthening mesh
Colour	Grey (red marking)
Type of adhesive	Acrylic
Grammage of adhesive	200 g/m ²
Thickness	270 µm
Adhesive strength on membrane	> 25 N/50 mm
Temperature for use	> -10°C
Temperature range	-40°C / +80°C
Weather resistance	6 months
Shelf life	12 monthss
Storage conditions	5-30°C / 35-65% RH
Ageing: Good stability over time.	
The adhesive retains its adhesive properties over an extended period
