Our Siberian Sturgeon Caviar is a high quality farm-raised caviar. Raised in commercial fisheries located in Germany, Siberian Sturgeon produces a medium sized roe that is dark gray in colour. The highlight is the Siberian Sturgeon Caviar's flavour, which is revered for its soft buttery, lightly salted taste that smoothly melts in your mouth. Similar in taste and texture to Caspian sturgeon caviar, Siberian Sturgeon Caviar has quickly become a favorite amongst our customers and employees.

In the wild, this species (*acipenser baerii*) is found throughout the Siberian region and its countless rivers including the Lena, Indirka, Ob, and Irtysh.

# CHOCOLATE - COUVERTURE

The iconic all-round white chocolate that always works. Recipe n° W2 is one of Octaaf Callebaut's original recipes that has grown into many chefs' preferred chocolate. This chocolate is as Belgian as can be, since it's mainly made with milk from cows grazing on Belgian pastures and sugar from locally grown sugar beets. It has a delightful taste with pronounced milky, creamy, caramelly and vanilla notes that are in perfect balance. W2 can be paired with a wide range of ingredients and flavours: from sour to bitter, from spices to herbs, and from fruits to beers. With its medium viscosity, this is a great all-round chocolate. Used in chocolate bars or hollow figures, it takes you by surprise with its lovely satin gloss and snappy texture. And fully rely on it to flavour mousses, cremes, ice creams, drinks, sauces, etc as well.

# HONEY

Turkish honey is said to be the best honey in the world. Our Raw honey from Turkey has a very mild taste that can be added to anything like your drink, salad dressing, sauces, baking etc. Raw honey is only strained before it's bottled, which means it retains most of the beneficial nutrients and antioxidants that it naturally contains. Conversely, regular honey may undergo a variety of processing, which may remove beneficial nutrients like pollen and reduce its level of antioxidants. That is why Chef's Choice Artisan Raw honey doesn't crystallise.

# NOODLES

Hakubaku’s authentic Japanese organic noodles are the world’s favourite. They epitomise the attention to detail at the heart of Japanese culture.

A global search for the world’s highest quality organic wheat, and the wheat varieties most suitable for making Japanese noodles, brought Hakubaku to Australia.

Not only did Hakubaku find secure supplies of the wheat it needs, but it also found an organic flour mill and the perfect site for a noodle factory - in Ballarat.

In 1996, Ballarat became home to Hakubaku Australia – a distant outpost of one of Japan’s most important culinary traditions.

Hakubaku Australia is now a proud contributor to a cuisine that is considered one of the most sophisticated – and one of the healthiest - in the world.

The production of gourmet oils is a time-honored tradition in France. Originally, each village had a mill which roasted and extracted the oil from nuts gathered by local farmers. These delicious oils were used in hearty rustic fare and were also found in Paris' finest restaurants.

La Tourangelle is one of just a handful of these remaining mills that keep this tradition alive: Hand-crafting a wide range of delicious artisan oils in both France and California, La Tourangelle distributes an exclusive line of premium quality oils in many countries around the world.

Walnut Oil

Walnut oil is delicious and easy-to-use oil. In salads, walnut oil mixes very well with balsamic vinegar or red wine vinegar to create simple but flavourful vinaigrette. Also try it with tarragon white vinegar. It is also delicious on grilled fish or meat: A dab of walnut oil is the perfect touch for enhancing flavours and easing digestion when added towards the end of your beef bourguignon or meat dishes. You can also try it in pasta with cheese. Don't hesitate to use it in cakes and baked goods, particularly with apples or pears. After harvesting, the nuts are washed, sorted, sun-dried for several days and stored for further drying. The walnut kernels are then ground and roasted in cast-iron kettles. The resulting warm paste is pressed in a hydraulic press. Following mechanical extraction, the oil is lightly filtered and bottled. Walnut oil is extracted from English walnuts only.

Hazelnut Oil

Roasted hazelnut oil is a well-kept secret of many top chefs. Great in salads, hazelnut oil combines very well with vinegar to produce light but flavourful vinaigrette. However, some say it goes even better with lemon juice. With pasta, potatoes and beans, hazelnut oil serves as a wonderful substitute for butter. Finally, hazelnut oil works great with fish, and you won't go wrong to give it a try with cheese or carpaccio. Once you "discover" hazelnut oil, you will return time and time again to rediscover this versatile treasure! The process of extracting the oil has not changed for centuries. First, the hazelnuts are ground and roasted in cast-iron kettles. The resulting warm paste is then pressed in a hydraulic press. Following mechanical extraction, the oil is lightly filtered and bottled. The leftover cake is sold as cattle feed or for use in bakeries.

Almond Oil

Roasted almond oil is an outstanding product in the kitchen. With its fresh roasted almond flavour, the oil reveals subtle nuances when combined with other ingredients. Its delicate character makes it a good substitute for olive oil in cases where walnut oil and hazelnut oil are just too powerful. When combined with any salad, fish or vegetable dish, almond oil helps to fashion a gourmet meal. Almond oil is very popular in India with duck and curry, and in China it is also used with chicken and duck. Give almond oil a try - you are sure to love it. After harvesting, the nuts are washed, sorted, sun-dried for several days and stored for further drying. The almonds are then ground and roasted in cast-iron kettles. The resulting warm paste is pressed in a hydraulic press. Following mechanical extraction, the oil is lightly filtered and bottled.

Avocado Oil

Avocado oil can be used the same way you use your extra virgin olive oil. But with a smoke point at 181 degrees it is very practical to use in the kitchen for pretty much any application. On salads or in a dressing, it contributes a hint of avocado flavour, and it is wonderful drizzled over slices of fruits. Cook, bake, dress or simply dip, avocado oil will make it all. Avocado oil is processed on equipment very similar to those used to process extra virgin olive oil. The avocado pulp is first expeller-pressed usually using a centrifuge. It is then lightly filtered and polished, using another centrifuge. The result is beautiful, emerald green oil with high level of monounsaturated fats that will bring a delicious, light avocado flavour to your dishes.

Pumpkin Seed

Toasted pumpkin seed oil adds a rich taste to salad dressing, soup, marinade, pasta, dips, pastries and more. Check out our recipe section for more. Black Truffle Oil

Black Truffles originate in Provence, France and are one of the most precious ingredients of Mediterranean cooking. The strong, intense, earthy flavour of this oil will bring a deep aroma to your dishes, and will especially complement pasta, mashed potatoes, meat and other dishes. Just like the most prestigious perfumes, the black truffle extract is very rare, expensive and difficult to source. Only a few companies master the art of producing the extract. We infuse the extract in Grapeseed Oil because of its great properties and its neutral flavour that won't interfere with the aroma like olive oil may do.

White Truffle Oil

White Truffles originate in Alba, Italy and are considered by many to be the most prestigious truffles. The strong, intense, earthy flavour of this oil will bring a deep aroma to your dishes, and will especially complement pasta, mashed potatoes, meat and other dishes. Just like the most prestigious perfumes, the white truffle extract is very rare, expensive and difficult to source. Only a few companies master the art of producing the extract. We infuse the extract in Grapeseed Oil because of its great properties and its neutral flavour that won't interfere with the aroma like olive oil may do.

Hazelnut Oil

Roasted hazelnut oil is a well-kept secret of many top chefs. Great in salads, hazelnut oil combines very well with vinegar to produce light but flavourful vinaigrette. However, some say it goes even better with lemon juice. With pasta, potatoes and beans, hazelnut oil serves as a wonderful substitute for butter. Finally, hazelnut oil works great with fish, and you won't go wrong to give it a try with cheese or carpaccio. Once you "discover" hazelnut oil, you will return time and time again to rediscover this versatile treasure! The process of extracting the oil has not changed for centuries. First, the hazelnuts are ground and roasted in cast-iron kettles. The resulting warm paste is then pressed in a hydraulic press. Following mechanical extraction, the oil is lightly filtered and bottled. The leftover cake is sold as cattle feed or for use in bakeries.

STONEBARN

Established in 2004 by Dion and Sharon Rang, Stonebarn is a large commercial truffle producer in the West Australian food and wine region of Manjimup – the heart of Australian truffle country. We found our very first Stonebarn truffle on 5 June, 2010.

We pride ourselves on the exceptional quality, taste and aroma of our truffles often attributed to our rich, sloping and free draining loam soils that create the ideal terroir.

The aroma and flavour of truffles have been described as earthy – the floor of the forest, damp earth, roasted dry fruits and chocolate – with a memorable aroma and lingering aftertaste. Nothing beats the exquisite experience of fresh truffle!

# SUGARS

Organic Raw Sugar

This organic raw sugar has a heavenly taste and is produced from 100% certified organic sugar cane grown on cooperative and sustainable family farms in Paraguay. Our sugar is hand cut and we do not burn or spray our fields.

Natural Sweetener Xylitol (sugar substitute)

It is a 100% natural sweetener that tastes just like sugar with no nasty aftertaste, but contains added health benefits. Made from non-GMO corn, it has 40% fewer calories and 75% less carbohydrates than sugar, and is also proven to aid dental health.

Organic Coconut Sugar

Coconut Sugar is a natural sugar made from evaporated coconut sap. A pure and unrefined sugar with a low GI, it is a natural alternative to processed sugars and artificial sweeteners. It adds a rich depth of sweet flavour to desserts and baked goods. It does not have a specific coconut flavour making it a really versatile sweetener in a wide range of recipes.

Chef's Choice Organic Rapadura Sugar

Chef's Choice Certified Organic Rapadura Sugar also known as Panela sugar is an unrefined and unbleached sugar, which is harvested from sugar cane and has a sweet caramel flavour and a fine texture. This healthy natural sweetener can be substituted for refined white sugar when baking or used to sweeten coffees, teas, hot chocolates, desserts and savoury dishes.

According to family tradition, TABASCO® brand Original Red Sauce was created in the mid to late 1860s by Edmund McIlhenny. A food lover and avid gardener, McIlhenny was given seeds of *Capsicum frutescens* peppers that had come from Mexico or Central America. On Avery Island in South Louisiana, he sowed the seeds, nurtured the plants and delighted in the spicy flavor of the peppers they bore.

Over 140 years later, TABASCO® Sauce is made much the same way except now the aging process for the mash is longer – up to three years in white oak barrels – and the vinegar is high-quality distilled vinegar. Labeled in 22 languages and dialects, sold in over 180 countries and territories, added to soldiers' rations and put on restaurant tables around the globe, it is the most famous, most preferred pepper sauce in the world.
