RESCUING WONKY FRUIT AND VEG ✓ COLD-PRESSED ✓ NEVER HEAT TREATED ✓ LOCAL PRODUCE

Daily Dose Juice – Our Story

George founded Daily Dose in 2016, after he discovered the mighty power of juice on his drastic weight loss journey. After shedding a massive 5 stone, he embarked upon a trip to LA that both ignited his love for cold pressed juice and revealed a gap in the British market.

Our produce is sourced directly from farmers, where possible within the UK. Whilst sourcing produce George rapidly discovered the vast volume of produce wasted daily due to the produce not conforming to the supermarket' strict criteria on shape and size. This revelation prompted George's commitment to fighting the food-waste epidemic by using wonky, surplus produce to make our juices.

Fast forward to 2019 and we are rescuing tonnes of wonky produce each week! At the tail end of production, we collect all of our left over pulp and have it broken down to produce biogas and biofertiliser. Every step of our process is designed to help us achieve our waste goals.

"Our cold-pressed juices are the perfect way to hit the reset button on your diet. I began Daily Dose with one goal, to produce juices that taste delicious, and nourish the body."

- ✂ Ordering 3+ days of cleansing? Each day's cleanse includes up to 9 bottles which will need to be stored in the fridge. If you're worried about fridge space, please contact us – we can always split cleanses of 3 days + to arrive in installments.

Where possible, please refrigerate the juices once they have arrived. Our juices maintain their nutritional content best (and taste!) when kept between 0-5°C.

Your Juice Cleanse – How To Prepare:

Juice Cleansing is a simple and convenient way of revitalising and rebooting the body. In everyday life we take in harmful toxins and pollutants that build up over time. Taking on a juice diet will help you to detoxify and hydrate.

All our juices are individually formulated to give specific benefits, our cleanses are carefully put together to combine these benefits for an overall goal.

- In the lead up to the cleanse, maintain a healthy and balanced diet, avoid refined sugars, processed food and caffeine... a golden rule – if you can't pronounce it, don't consume it!
- During your cleanse – relax, participate in light exercises, for example practice yoga or head out for a long walk.
- Consult a medical professional to seek advice tailored to your health.
