

THE ORIGINAL

AIRREX[®]

MARKET LEADING **INFRARED BIOHEATERS** & INFRARED ELECTRIC HEATERS

SAVE MONEY.

MOST EFFICIENT

Fastest way to heat large spaces with minimum energy consumption.

PLUG AND PLAY

Installation is not required.

FOR INDOOR USE

Suits spaces 50 m²+ with normal ventilation.

WIFI-CONNECTION AND MOBILE APP

You can adjust the temperature, view messages and the amount of fuel directly in your smartphone! **When you use the mobile application, you get an additional year of warranty.**

SPARE PARTS & WARRANTY

All original AIRREX spare parts are always in our warehouse. Warranty maintenance is always carried out at the customer's premises – simple and carefree!

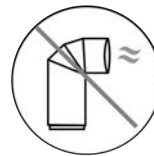

SAVE MONEY

Low consumption

NO FUMES

Does not emit burning smells

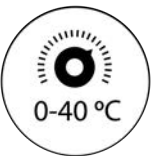

CLEAN COMBUSTION

No need for an exhaust pipe

NO DUST

No fan

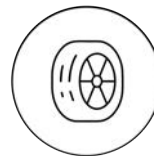

THERMOSTAT

Temperature adjustment range (0–40°C)

QUIET,

only 48 dB

MOBILE

Castor wheels, installation is not required

BIODIESEL

or diesel / red diesel

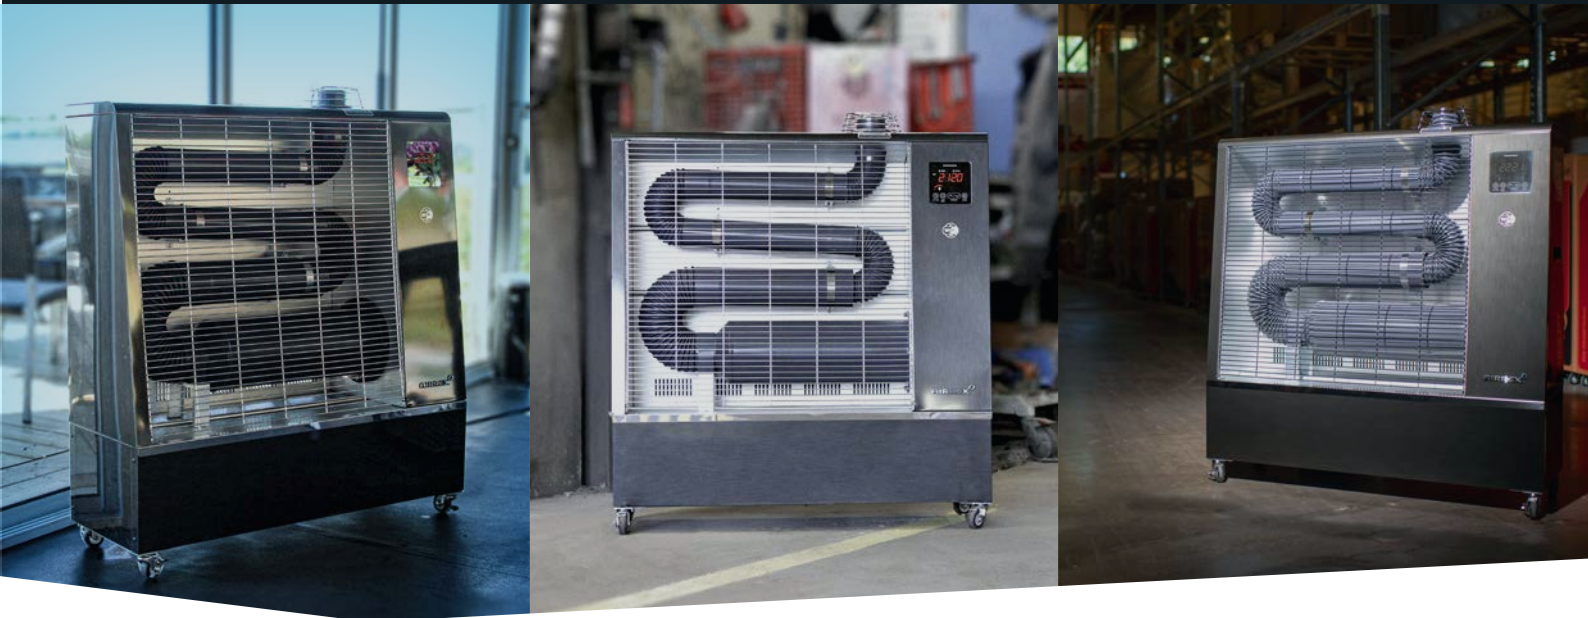

WHY AIRREX?

Infrared radiation heats up the material in addition to the air. The heat is even and no fan is needed. Ventilation in accordance with building regulations is sufficient.

AIRREX[®]

THE ORIGINAL.

AIRREX is the market leader in fuel-driven infrared heaters.
AIRREX infrared heaters have already been manufactured for almost 30 years.

Fastest heating (and drying) of larger spaces with minimum energy consumption.

ADVANCED BURNER

The device has a oil burner with an electric fuel pump that circulates the combustion gases through pipelines with ceramic coating and creates heat as infrared radiation.

NO EMISSIONS

The triple combustion process ensures complete and clean combustion. Normal ventilation is sufficient.

EFFECTIVE SOUND DAMPENING

The silencing system inside the exhaust pipe that compresses and expands the exhaust makes AIRREX very quiet - only 48dB.

TOUCH CONTROL

Simple soft-touch control panel with LED display and remote control.

FUEL

Biodiesel, Diesel or Red Diesel.

SAVE MONEY!

CONSUMPTION EXAMPLE: AIRREX AH-300i

- > Insulated industry hall 500m³
- > Temperature outside: 0°C
- > Temperature inside: + 15°C

> **Fuel consumption
approx. 2,5 l / day**

BIODIESEL

Biodiesel or diesel / red diesel

AH-200i WiFi

Best suited to heating spaces like terraces, garages and greenhouses.

AH-300i WiFi

Best suited to heating spaces like workshops, halls, warehouses, event tents and terraces.

AH-800i WiFi

Best suited to heating spaces like large workshops, industrial halls and event tents.

COMPARISON TABLE

		AH-200i	AH-300i	AH-800i
Heating Capacity	kW/h - Btu/h	13kW/h = 44356 Btu/h	15kW/h = 51180 Btu/h	22kW/h = 75064 Btu/h
Suitable for spaces up to	m ³	900	1500	2000

Compliant with the EU's emissions regulations		●	●	●
WiFi (4G-connection option)		●	●	●

IS AIRREX BIOHEATER SAFE?

AIRREX Bioheater is a very safe heater; it has twelve different safety systems such as combustion monitoring, tilt- and overheating sensors.

HOW DO I INSTALL THE BIOHEATER?

The AIRREX infrared Bioheater does not

require a separate installation. Load fuel into the tank, insert the plug into the wall and AIRREX is ready to be used. The wheeled heater is easy to move where you want.

CONTROL BIOHEATER REMOTELY WITH WiFi!

In the AIRREX app you can see real-time information, for example, the

temperature in the room being heated, the amount of diesel and whether the heater is running or not. Informative messages are also displayed in the app. The heater can be connected to an existing WiFi network. If there is no WiFi network the heater has a place for an optional 4G router. The heater can also be used without WiFi.

ELECTRIC

AH-720 **NEW MODEL**

Best suited to heating spaces like terraces, balconies, barns, guest houses, caravan tents, barracks, offices, summer cottages etc.

Patented electric heating solution for efficient and comfortable heating. Infrared radiation heats up the material instead of the air, making the heat feel like the sun's heat. The heating capacity of the heater can also be enhanced with a built-in fan. The light heater is equipped with

wheels and does not require fixed installation. AH-720 has a over voltage and overheating protection, tilt sensor that switches off the heater if it falls, and protective earth. This new AH-720 model stops heating completely when reaching the set temperature.

TECHNICAL INFORMATION

AH-720 ELECTRIC

Heating Capacity	2,8 kW (Infra Plate 1,6 kW, halogen 1,2 kW)
Recommended area for heating	Ca 10-100 m ² (room height Ca 2,5 m)
Power consumption	11,8 A
Fan capacity	2,0 m ³ / min
Electrical connection	1-phase, 230 V, 50 Hz
Dimensions (W x D x H)	54 x 29 x 80 cm
Weight	15 kg
Thermostat controlled	●
Remote control & Timer 0-24 hours	●

HOW MUCH IS THE POWER CONSUMPTION?

When the Bioheater starts, it takes 85W. After the start, it only takes 60W an hour when the heater is running.

WHY DOESN'T BIOHEATER SMELL?

When the fuel used is completely incinerated, it generates no odor or hazardous emissions. AIRREX's product

development history goes back over 30 years, so the heater's function has been fine-tuned very carefully.

DOES THE HEAT SPREAD EVENLY?

Yes. Infrared heat is spread evenly and very far. Many people have an idea that a fan is needed for the heat transfer, for example, to get the heat all the way to the other end of the hall. No fan is

needed – the infrared Bioheater heats up materials, walls, floors and all other materials in the space.

100% SPARE PARTS WARRANTY

All original AIRREX spare parts are always in our warehouse.

SERVICE KIT

Maintenance should be carried out annually on AIRREX heaters. Includes fuel filters, gaskets, nozzle and manual.

Service kit AH-200/AH-300	AH10046
Service kit AH-200i/AH-300i	AH10180
Service kit AH-800/AH-800i	AH10047

PROTECTIVE FRAME

The AIRREX protective frame protects the heater from dents caused by heavy use. The big wheels underneath make it easier to move the heater in challenging conditions.

Protective Frame AH-300/AH-300i	AH10109
Protective Frame AH-800/AH-800i	AH10112

ULTRA PERFORMANCE DIESEL OPTIMIZER

Prevents bacterial growth in diesel. **REX10064**

DIESEL CHOCK

Prevents the growth of bacteria and kills existing bacteria from the fuel tank within 24 hours. **REX10074**

AIR NOZZLE

If the air nozzle is extremely sooty, the burner has been affected by a lack of ventilation and it requires changing. **AH10028**

FUEL FILTER

Fuel filter for AIRREX heaters must be replaced at least once a year depending on usage. **AH10017**

PIPE EXTENSION

Do you want to redirect fuel gases somewhere else? Suitable for fuel-driven AIRREX heaters. Not suitable for export through wall.

Uninsulated pipe 1000mm AH-200/300/800	AH10168
Uninsulated pipe 500mm AH-200/300/800	AH10169
90° angle for uninsulated pipe AH-200/300/800	AH10177
0-90° adjustable angle for uninsulated pipe AH-200/300/800	AH10167

TRANSPORT CART

With large wheels and a detachable draw bar. The heater can be used when it is on the trolley.

Transport cart AH-200i/AH-300i	AH10116
Transport cart AH-800i	AH10117

BATTERY-POWERED FUEL TRANSFER PUMP

With this pump, you can transfer fuel from canister to another or easily fill up your AIRREX heater. Capacity: 4000l of liquid with two D-series batteries. **DP08EA**

SILENCER

Silencer for AIRREX heaters. Placed over the exhaust pipe, the silencer reduces the noise made by the heater by approximately 2 dB. **AH10106**

The official service network

REX NORDIC SERVICE

Our service personnel is highly skilled and we only use original spare parts. Our well-equipped service vans are easy to order on-site, wherever you need.

WHY SHOULD YOU USE OUR SERVICE?

1. We are the only official service provider for AIRREX products.
2. We only use original spare parts.
3. 100% spare parts availability.
4. Competent, professional and friendly service staff.
5. You get fast, high-quality service.

ANNUAL MAINTENANCE

Does your machine need service? You can do the service by yourself or order the service from us. Our well-equipped service car and trained technicians are happy to service your machine.

UNDER WARRANTY WORK

The warranty work is always performed at the customer's premises at no additional cost. Fuel-powered heaters have a 3-year warranty if you are using the AIRREX mobile application.

WE ARE HERE FOR YOU

REX NORDIC

rexnordic.com

We are the biggest mobile heater supplier in Europe for professionals and we point the way to heater technology. At Rex Nordic we believe in operational excellence, providing the best products and services for all our customers. We already have almost 1000 retailers and we're growing rapidly throughout Europe.
